Carotenoids and Human Health Jaume Amengual, 2019-12-03 Carotenoids are a group of approximately 600 compounds synthesized by photosynthetic organisms These pigments are abundant in fruits and vegetables as well as in certain animal products such as eggs and salmon being responsible for their colorful appearance The bioactive properties of certain carotenoids in human health are clear as some of these compounds have antioxidant properties and serve as the only precursors of vitamin A in nature The aim of this Special Issue entitled Carotenoids and Human Health is to provide the scientific community with an updated perspective of this exciting and growing research area We compiled 19 papers from some of the most prominent scientists in the carotenoid field including seven literature reviews and 12 original publication covering topics such as cancer obesity vision cognitive function and skin health *Carotenoids in Human Health* Louise M. Canfield, Norman I. Krinsky, James A. Olson, 1993 Here internationally recognised authorities present their recent findings and perspectives on future research in basic and clinical carotenoid research Coverage includes carotenoid chemistry metabolism of carotenoids in human health and actions of carotenoids in biological systems Of particular interest are recent findings which suggest a role for carotenoids in coronary heart disease cancer and immune functions Carotenoids and Human Health Jaume Amengual, 2019 Carotenoids are a group of approximately 600 compounds synthesized by

regarding the use of c **Carotenoids: Structure and Function in the Human Body** Muhammad Zia-Ul-Haq, Saikat Dewanjee, Muhammad Riaz, 2021-02-17 Plants produce chemicals as part of their normal metabolic activities These include primary metabolites found in all plants such as sugars and fats as well as secondary metabolites which can have therapeutic effects in humans and be refined to produce drugs Plants synthesize a bewildering variety of phytochemicals but most are derivatives of a few biochemical motifs Numerous herbal derived substances have been evaluated for their therapeutic potential These include alkaloids coumarins saponins plant pigments and flavonoids Flavonoids carotenoids and anthocyanins are probably the best known of these substances due to their antioxidant properties Carotenoids Structure and Function in the Human Body presents comprehensive coverage of carotenoids The text covers the scientific literature and clinical significance of this organic pigment with an emphasis on its therapeutic potential The authors approach carotenoids from a range of perspectives from their structural and physicochemical properties to their distribution in nature interaction with the human metabolism and use as a coloring agent in various products The intake metabolism and secretion of anthocyanins in the human body are covered in depth as are the biosynthetic pathways through which these compounds are synthesized in the natural system Factors affecting stability and extraction are listed and health related uses and biological activities are covered in great detail Present and future trends in carotenoid research are also presented This book provides a solid background in carotenoids for researchers and professionals in food science food technology nutrition biology chemistry and medical sciences **Carotenoids: Importance in Human Nutrition and Health** Julia Murphy, 2023-09-19 Carotenoids are a class of phytonutrients synthesized by plants algae and photosynthetic bacteria These richly colored molecules are responsible for the yellow orange and red colors of many fruits and vegetables Carotenoids can be broadly classified as carotenes and xanthophylls based on the chemical contained in them There are several types of dietary carotenoids such as a carotene b carotene b cryptoxanthin lutein zeaxanthin and lycopene Mangoes papayas carrots sweet potatoes spinach and pumpkins are some good sources of a carotene Carotenoids play diverse roles in promoting human health They act as antioxidants in the human body and have strong cancer fighting properties The body converts some carotenoids into vitamin A which is essential for vision normal growth and development The anti inflammatory and immune system benefits of carotenoids can help in preventing cardiovascular diseases The book outlines the importance of carotenoids in human health in detail With its detailed analyses and data it will prove immensely beneficial to nutritionists registered dieticians and medical students involved in the field of clinical nutrition and dietetics at various levels The Alga Dunaliella Ami Ben-Amotz, 2019-05-07 This volume presents a state of the art research in biochemistry molecular biology and medical application A glossary of specialized terms is appended Each chapter is contributed by an expert or group of experts dedicated to increase our understanding of Dunaliella All the chapters were reviewed internally by their colleagues editors and external reviewers this was followed by a final revision The book provides a balanced multi disciplinary communication

and contributes to our understanding of this unique alga It is addressed to graduate students and scientists as a summary of current thoughts on Dunaliella **Carotenoids Volume 5: Nutrition and Health** George Britton,Synnove Liaaen-Jensen,Hanspeter Pfander,2009-12-29 The Carotenoids book series provides an introduction to the fundamental chemistry detailed accounts of the basic methods used in carotenoid research and critical discussions of the biochemistry functions and applications of carotenoids The use of carotenoids against diseases is discussed This volume is to be used in conjunction with the Carotenoids book series and the Carotenoids Handbook **Dietary Carotenoids** ,2024-03-20 In recent years scientists have identified several biologically active compounds from plant and animal foods having beneficial health effects Technically they are not nutrients despite having beneficial health properties Instead they are referred to as phytonutrients nutraceuticals and functional ingredients Taking advantage of these compounds benefits food pharmaceutical and cosmetic manufacturers now include them in their commercial products However unlike vitamins and minerals they do not have recommended levels of daily intake Consumers are simply advised to include foods and supplements that are good sources of these phytonutrients as part of a healthy diet In general biologically active compounds are classified based on their solubility in water or lipids The focus of this book is on a lipid soluble group of compounds referred to as carotenoids Written by international researchers this book addresses topics such as the properties of various carotenoids their dietary sources mechanisms of action and their role in the management and prevention of chronic human diseases This book provides valuable information for a wide range of readers including consumers researchers nutritionists other health professionals and regulatory agency personnel *Carotenoids, Volume 3: Biosynthesis and Metabolism* G. Britton,S. Liaaen-Jensen,H. Pfander,1995 Volume 3 of the Carotenoids series moves into the area of biochemistry biology concentrating on how the carotenoid molecules are formed in nature utilized or modified by living organisms Animals cannot biosynthesize carotenoids de novo Dietary carotenoids provide most of the vitamin A that is vital for health development in humans other mammals The formation of vitamin A the absorption transport deposition of carotenoids in tissues in mammals are described followed by a detailed account of the diverse metabolic reactions by which dietary carotenoids undergo structural stereochemical changes in birds fish invertebrate animals The relevance of carotenoids for use as markers to trace food chains is also discussed In keeping with the philosophy of the carotenoid series guidance on the application of some of the most important experimental procedures for studies of biosynthesis metabolism are given in the final chapter The information presented analyzed by expert authors in this volume will serve as a useful reference source give valuable guidance on practical strategies procedures as a foundation for the exciting advances that can be expected in carotenoid biosynthesis metabolism in the next few years *Carotenoids* Agnieszka Kaczor,Malgorzata Baranska,2016-01-12 Carotenoids are an essential component of the human diet Bioactive by nature they are rich in antioxidants promote vitamin A activity and lower the development of chronic illnesses As such they are an area of growing interest to researchers and
