

part of this unit's efficiency. Carrier heat exchangers are backed by a Limited Lifetime Warranty. (See Warranties section for details.)

When we put it all together, the model 58MTA combines quality and design to bring high efficiency and comfort. You will enjoy the versatility and ease of installation of this unit. The model 58MTA is equipped for either left- or right-side connections. Blower speeds are easily adjustable with speed-taps conveniently located on the control center. An updated, more efficient combustion inducer allows for more use of 2-in. vent and combustion-air piping, keeping installation costs low.

As with other Carrier furnaces, this model is designed to work as a part of the total home comfort system which includes elements for cooling, air cleaning, humidification, ventilation, and zoning.

## 58MTA FEATURES/ BENEFITS

**4-Way Multipoint Design** — Allows the model 58MTA to be installed in an upflow, downflow, or horizontal orientation. Factory configured for upflow applications with only simple drain connection changes required for conversion to downflow or horizontal.

**Media Filter Cabinet** — Enhanced indoor air quality in your home is made easier with our media filter cabinet—a standard accessory on all furnaces. When installed as a part of your system, this cabinet allows for an easy and convenient addition of a Carrier high-efficiency air filter.

**Comfort Heat Technology**—The 58MTA has a 2-stage gas valve to vary

the amount of gas being used from low-heat to high-heat stage. The low-stage operation allows longer running periods, which helps maintain your most comfortable temperature, prevents drafts, reduces noise, and enhances the air quality of your home. During the extreme cold, the high-heat levels will run to ensure that you are still comfortable.

**Warranties** — Limited Lifetime Warranty on the heat exchangers for the lifetime of original owner in single family residence; 20 years in other residential and commercial applications. 5 year Limited Warranty on entire unit. Contact your dealer for details.

**Permanent split capacitor (PSC) Blower Motor** — The 58MTA has a PSC blower motor that has several preselected fixed speeds which can be customized to duct work installation requirements. The motor has a wide application of use, a basic control scheme, and is extremely reliable.

**Two-Speed Inducer Motor** — This motor works with the inducer fan to optimize combustion efficiency and exhaust the flue gases out of the house. The motor has two speeds and an incorporated fan to keep the motor cool while reducing sound.

**Adaptive Logic Control Board** — This self-adjusting control board contains a computer chip which automatically calculates the precise amount of time your furnace should run and at what speed it should run to obtain the best comfort and energy efficiency. This control board also includes an extensive troubleshooting and component test sequence that can monitor your heating system to ensure that it is operating

properly.

**Primary Heat Exchanger & Secondary Heat Exchanger** — The primary heat exchanger is corrosion resistant and maintains a proven track record for long-term reliability and high-efficiency performance. The secondary heat exchanger is built with a patented lamination process that bonds a corrosion-proof lining of polypropylene to a heavy, galvanized steel shell. The unique secondary clamshell design allows wider spacing between cells for reduced air resistance through the furnace, reduced load on the blower motor, and reduced need for cleaning.

**Hot Surface Ignitor** — This electronic ignition prevents wasted gas associated with pilot lights.

**Soft Motor Mounts** — These motor mounts help to absorb shock, decrease the vibration of the motor, and minimize noise.

**Full Cabinet Insulation** — This insulation completely surrounds the internal furnace casing allowing for reduced and dampened sounds and maintained efficiencies.

**ComfortFan** — Improves comfort all year long by allowing the homeowner to select different fan speeds during continuous fan operation to achieve more or less airflow. This is done right at the thermostat.

**SmartEvap** — This feature allows your system to reduce summer time humidity levels by nearly 10% over standard systems.
