This book is intended for use as a student guide. It is about human problem solving and provides information on how the mind works, placing a major emphasis on the role of computers as an aid in problem solving. The book is written with the underlying philosophy of discovery-based learning based on two premises: first, through the appropriate study of the discipline of problem solving, a student can get better at solving both school problems and nonschool problems; second, computers are a powerful aid to problem solving and a student can get better at solving certain types of problems by learning to make appropriate use of computers. Methodologies that cut across all disciplines such as journals, learning to learn, metacognition and modeling are discussed. The chapters are as follows: 1. Introduction 2. You Are a Smart Person 3. What Is a Problem 4. A Four Step Plan for Solving a Problem 5. Problem Solving Strategies 6. Getting Better at Thinking 7. Transfer of Learning 8. Modeling 9. General Purpose Computer Tools and 10. Computer Systems. A glossary is included. TMK
