*Robotics Research* Masayuki Inaba, Peter Corke, 2016-04-22 This volume presents a collection of papers presented at the 16th International Symposium of Robotic Research ISRR ISRR is the biennial meeting of the International Foundation of Robotic Research IFRR and its 16th edition took place in Singapore over the period 16th to 19th December 2013 The ISRR is the longest running series of robotics research meetings and dates back to the very earliest days of robotics as a research discipline This 16th ISRR meeting was held in the 30th anniversary year of the very first meeting which took place in Bretton Woods New Hampshire USA in August 1983 and represents thirty years at the forefront of ideas in robotics research As for the previous symposia ISRR 2013 followed up on the successful concept of a mixture of invited contributions and open submissions 16 of the contributions were invited contributions from outstanding researchers selected by the IFRR officers and the program committee and the other contributions were chosen among the open submissions after peer review This selection process resulted in a truly excellent technical program which featured some of the very best of robotic research These papers were presented in a single track interactive format which enables real conversations between speakers and the audience The symposium contributions contained in this volume report on a variety of new robotics research results covering a broad spectrum organized into traditional ISRR categories control design intelligence and learning manipulation perception and planning

**Visual Analysis of Humans** Thomas B. Moeslund, Adrian Hilton, Volker Krüger, Leonid Sigal, 2011-10-08 This unique text reference provides a coherent and comprehensive overview of all aspects of

video analysis of humans Broad in coverage and accessible in style the text presents original perspectives collected from preeminent researchers gathered from across the world In addition to presenting state of the art research the book reviews the historical origins of the different existing methods and predicts future trends and challenges Features with a Foreword by Professor Larry Davis contains contributions from an international selection of leading authorities in the field includes an extensive glossary discusses the problems associated with detecting and tracking people through camera networks examines topics related to determining the time varying 3D pose of a person from video investigates the representation and recognition of human and vehicular actions reviews the most important applications of activity recognition from biometrics and surveillance to sports and driver assistance [State-of-the-Art Sensors Technology in Spain 2017 Volume 1](#) Gonzalo Pajares Martinsanz,2018-05-22 This book is a printed edition of the Special Issue State of the Art Sensors Technology in Spain 2017 that was published in Sensors [Handbook of Robust Low-Rank and Sparse Matrix Decomposition](#) Thierry

Bouwmans,Necdet Serhat Aybat,El-hadi Zahzah,2016-05-27 Handbook of Robust Low Rank and Sparse Matrix Decomposition Applications in Image and Video Processing shows you how robust subspace learning and tracking by decomposition into low rank and sparse matrices provide a suitable framework for computer vision applications Incorporating both existing and new ideas the book conveniently gives you one stop access to a number of different decompositions algorithms implementations and benchmarking techniques Divided into five parts the book begins with an overall introduction to robust principal component analysis PCA via decomposition into low rank and sparse matrices The second part addresses robust matrix factorization completion problems while the third part focuses on robust online subspace estimation learning and tracking Covering applications in image and video processing the fourth part discusses image analysis image denoising motion saliency detection video coding key frame extraction and hyperspectral video processing The final part presents resources and applications in background foreground separation for video surveillance With contributions from leading teams around the world this handbook provides a complete overview of the concepts theories algorithms and applications related to robust low rank and sparse matrix decompositions It is designed for researchers developers and graduate students in computer vision image and video processing real time architecture machine learning and data mining [Visual Attributes](#) Rogerio Schmidt Feris,Christoph Lampert,Devi Parikh,2017-03-21 This unique text reference provides a detailed overview of the latest advances in machine learning and computer vision related to visual attributes highlighting how this emerging field intersects with other disciplines such as computational linguistics and human machine interaction Topics and features

presents attribute based methods for zero shot classification learning using privileged information and methods for multi task attribute learning describes the concept of relative attributes and examines the effectiveness of modeling relative attributes in image search applications reviews state of the art methods for estimation of human attributes and describes their use in a range of different applications discusses attempts to build a vocabulary of visual attributes explores the connections between

visual attributes and natural language provides contributions from an international selection of world renowned scientists covering both theoretical aspects and practical applications     **Machine Learning and Data Mining in Pattern**
