*Crystallization and Solidification Properties of Lipids* Neil Widlak, Richard W. Hartel, Suresh Narine, 2001 Annotation The crystallization and solidification properties of lipids influence their functional properties in biological systems foods personal care products pharmaceuticals and oleo chemicals. To help its members and others optimize products or systems containing lipids the American Oil Chemists Society devoted its 2000 conference held in Toronto to the fundamental principles of lipid crystallization. The resulting 20 papers discuss phase behavior and polymorphism lipid crystallization kinetics microstructure and rheology and crystallization in emulsions. They also consider applications to dairy systems manufacturing chocolate confection and the texture of fats. Annotation c Book News Inc Portland OR booknews.com

A New Concept in Layer Based Fractional Crystallization Processes for Fats Kesarin Chaleepa, 2010 **Crystallization and Polymorphism of Fats and Fatty Acids** Nissim Garti, 1988-09-02 Deals with the physical and chemical characteristics of fats and fatty acids coordinating two approaches the microscopic analysis of polymorphic structures and macroscopic technical control of production. *Structure and Properties of Fat Crystal Networks* Alejandro G. Marangoni, Leendert H. Wesseldorp, 2012-09-25 Lipid science and technology has grown exponentially since the turn of the millennium. The replacement of unhealthy fats in the foods we eat and of petroleum based ingredients in the cosmetics we use is a top priority for consumers government and industry alike. Particularly for the food industry removing trans fats and reducing saturated fat.

Sonocrystallization of Fats Silvana Martini, 2013-06-28 Sonocrystallization of Fats will summarize the latest research efforts and discoveries in the relatively new area of sonocrystallization of edible lipids. Ultrasound has

been used extensively in the past to induce the crystallization of molecules Until recently however very little work has been done using power ultrasound to induce the crystallization of edible lipids and understand how the phenomena applies in these systems Power ultrasound is used in fats to induce their crystallization and to generate small crystals which ultimately result in a harder material Since the elimination of trans fats from food products novel processing technologies have been sought to improve the functional properties of low saturated no trans lipids Power ultrasound can be used as a new processing condition to modify the crystallization of fats and tailor their functional properties to specific food uses This Springer Brief will describe recent research performed in the area of sonocrystallization of fats and the possible application in the food industry An overview of ultrasound theories will be presented at the beginning of the book followed by a brief description of the uses of power ultrasound in the food industry Description of recent research in the area of fat sonocrystallization and detailed information regarding the experimental conditions used such as type of equipment and ultrasound settings will be presented The book will end with a description of the future trends in sonocrystallization of fats in the food industry **Fat Crystallization in Emulsions** Catherine Simoneau,1990 **Fat Crystal Networks** Alejandro G. Marangoni,2004-12-27 The first authoritative source on the subject this reference discusses the various levels of structure that influence the macroscopic physical properties of fat crystal networks Fat Crystal Networks summarizes 50 years of structural research in the field as well as a wealth of information on fat crystal networks pertinent to real world challenge
