Social Buzz Healing Trauma Guide:

Healing is What Makes Peace Work Angi Yoder-Maina, 2022-09-13 The book goes beyond mental health and psychosocial support MHPSS to a holistic approach centered on healing. The book lays at the intersection of peacebuilding, global mental health, and development. In many parts of the world, entire generations live in chronic violence just surviving. The exposure to violence has long-lasting effects which are not well accounted for in conflict analysis, stabilization efforts, peacebuilding, and governance initiatives. Extreme exposure to violence, abuse, neglect, and marginalization negatively affects levels of resilience and the ability of affecting the transition from violence to peace. A healing-centered peacebuilding approach requires fundamental changes in how systems are designed, organizations function, and practitioners engage with people, their communities, and their institutions. Key elements of the practice-based approach included inclusion, customization, and contextualization, breaking cycles of violence, systems thinking, and trauma-informed tools. The approach considers emotional distress to be a critical variable in violent conflict and instability. Trauma is not only a consequence of violence but also a cause of instability.

Trauma-Informed, Culturally Based Intervention Nimo Bokore, 2026-01-01 This book examines war-related trauma, the impacts of forced migration, and the importance of emphasising body-brain responses in social work practice. The author integrates neuroscience and social work through an innovative approach to better understand the trauma process and survivors' healing journeys. This approach presents a trauma-informed, culturally based intervention (TICBI) model for social workers and other practitioners to implement. This book is crucial because the world faces a new level of trauma driven by global conflicts and forced displacement. These conflicts most profoundly affect survivors from non-Western cultures who often lack adequate support through current social work practices that tend to rely on Western ideas and a one-size-fits-all approach. This book provides social workers and other professionals with an innovative way to support refugees and survivors of war. The TICBI model introduced by the author will help practitioners address the emotional aftermath of war-related trauma, intergenerational trauma, and the role of culture in both the experience and healing processes. Working with survivors of war and forced migration requires integrating neuroscience and social work to understand the impacts of war-related trauma and the healing process. Using the TICBI model, this book not only emphasizes experience but also highlights the vital role of culture in survivors' healing journey. By emphasising culture alongside neuroscience and social work, this model offers a distinctive intervention approach that prioritises localised and needs-based support for multicultural and multiethnic refugees seeking services. Trauma-Informed Culturally Based Intervention: Integration of Neuroscience and Social Work in Supporting Refugees aims to assist social workers and clinical practitioners in their work with survivors by providing a step-by-step guide for intervention. Each chapter is designed to deliver actionable insights that practitioners can use as a guide or an additional resource when working with survivors. At the end of each chapter, readers can reinforce their learning through comprehension questions. Graduate students in social work, psychology, nursing, and public health, as well as

As a therapist Gretchen Schmelzer has watched far too many people quit during treatment for trauma recovery They find it too difficult or frightening or they decide that it's just too late for them Schmelzer wrote *Journey Through Trauma* specifically for survivors to help them understand the terrain of the healing process and stay on the path She begins by laying out three important assumptions that support a survivor's healing that it is possible that it requires courage and that it cannot be done alone Traumas that happen more than once child abuse sexual abuse domestic violence gang violence war are all relational traumas They are traumas that happen inside a relationship and therefore must be healed inside a relationship whether that relationship is with a therapist or within a group She then guides readers through the five phases that every survivor must negotiate Preparation Unintegration Identification Integration and Consolidation She creates a mental map of the healing process that helps survivors recognize where they are in their journey to health see where the hard parts occur and persevere in the process of getting well Since the cycle of healing repeated trauma is not linear the survivor comes to understand that circling back around to a previous stage actually means progress as well as facing new challenges Ultimately the healing journey is one of trust as survivors come to trust their capacity to rely on help from others and to trust themselves and the work they have done *Trauma and Abuse Healing* Heidi Thompson-Henyon,2020-06-02 Trauma and Abuse Healing equips counselors and therapists with easy to use tools and practices to implement on their clients that have helped many to find daily peace and solace In Trauma and Abuse Healing Heidi Thompson Henyon employs her knowledge and wisdom of many different rituals and ceremonies to show counselors and therapists how to lead their clients to better healing Trauma and Abuse Healing teaches How to tailor ritual and ceremony to an individual client's beliefs and needs How to introduce tools that will get fast healing for clients How to leverage community and group therapy to facilitate faster
