

Short Questions**Q2. Give short answers to the following questions.****i. Define computer program.**

A program is a set of instruction(statements) written in a programming language to solve a particular problem.

Or

A program is a set of instruction that tells the computer what to do and how to do.

ii. Differentiate between syntax and semantic.**Syntax**

- i. Rules of a programming language.
- ii. Describes the way to write correct statement in a program.

Semantic

- i. Gives meaning to statement.
- ii. Describes the sequence of operation to be performed by a computer.

iii. Write three differences between assembly language and HLLs.**Assembly Language**

- i. Consists of symbolic code or abbreviations known as mnemonics.
- ii. Use assembler to convert assembly language to machine language.
- iii. Requires more attention to detail.

High Level language

- i. Use English language words such as print, go to, if, end.
- ii. Use compiler/interpreter to convert high level language to machine code.
- iii. Requires less attention to detail.

iv. Write four characteristics of HLLs.

1. These languages were developed to make computer programming simple, easier and less prone to errors.
2. The process of finding and removing errors in programs (debugging) is easier in high-level languages compared to low level language.
3. Program written in high-level language must be translated into machine language by a compiler or an interpreter before execution by the computer.
4. High-level languages are not machine dependent. They enable programmers to write programs that are independent of a particular type of computer.

v. Define Integrated Development Environment (IDE).

IDE is a software that bring all the processes and tools required for program development into one place. It provides an ease to the programmer.
