

A large, dark, textured alien head with a mechanical, ribbed mouth is positioned at the top of the frame, looking down. A human man with a shocked expression is being held by a large alien hand, which is gripping his face. The background shows a landscape with a tall, thin alien tower in the distance.

Science-fiction Studies ,2007 **The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film** Michael Frank,2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from The Dynamiter and The Secret Agent through late Victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines The Cultural Imaginary of Terrorism will be a valuable resource for those with interests in the areas of Literature and Film Terrorism Studies Peace and Conflict Studies Trauma Studies and Cultural Studies **Allelopathy** Zahid A. ### **Young Adult Science Fiction** Charles William

Sullivan, 1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications machines and gadgetry When authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need The result was science fiction written especially for young adults While critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value Science fiction inspired many young adults to study science and engineering and helped foster technological innovation At the same time these works also explored cultural and social concerns more commonly associated with serious literature Nor was young adult science fiction a peculiarly American phenomenon authors in other countries likewise wrote science fiction for young adult readers This book examines young adult science fiction in the U S and several other countries and explores issues central to the genre The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development Included are discussions of science fiction for young adults in the U S and in Canada Great Britain Germany and Australia These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present The second section of the book considers topics of special interest to young adult science fiction Some of the chapters look at particular forms and expressions of science fiction such as films and comic books Others treat particular topics such as the portrayal of women in Robert Heinlein s works and representations of war in young adult science fiction Yet another chapter studies the young

adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies *Do Metaphors Dream of Literal Sleep?* Seo-Young Chu,2011-01-15 In culture and scholarship science fictional worlds are perceived as unrealistic and altogether imaginary Seo Young Chu offers a bold challenge to this perception of the genre arguing instead that science fiction is a form of high intensity realism capable of representing non imaginary objects that elude more traditional realist modes of representation Powered by lyric forces that allow it to transcend the dichotomy between the literal and the figurative science fiction has the capacity to accommodate objects of representation that are themselves neither entirely figurative nor entirely literal in nature Chu explores the globalized world cyberspace war trauma the Korean concept of han and the rights of robots all as referents for which she locates science fictional representations in poems novels music films visual pieces and other works ranging within and without previous demarcations of the science fiction genre In showing the divide between realism and science fiction to be illusory *Do Metaphors Dream of Literal Sleep* sheds new light on the value of science fiction as an aesthetic and philosophical resource one that matters more and more as our everyday realities grow increasingly resistant to straightforward representation *Who Shaped Science Fiction?* Robert Sabella,2000 This book combines the reading public's interest in science fiction with the always popular biography genre The book contains one hundred concise chapters each containing a brief biography of one of the most influential figures in the development of modern science fiction as well as a timetable detailing the highlights of the person's life and career Included are important editors such as John Campbell Jr and Hugo Gernsback filmmakers such as Gene Roddenberry and Stanley Kubrick and most importantly acclaimed writers ranging from historical figures Jules Verne Edgar Allan Poe Arthur Conan Doyle and H G Wells to modern masters Arthur Clarke Isaac Asimov and Robert Heinlein *Horror and Science Fiction Films IV* Donald C. Willis,1997-08-07 This fourth title in a unique series that combines reference and analytical qualities in chronicling the horror and science fiction genres *Horror and Science Fiction Films IV* brings the earlier three volumes in the series up to date concentrating on the period from 1984 1994 as well as updating entries from the previous volumes and adding newly discovered titles from 1900 1983 Entries in the main list include credits cast synopsis and annotation The introduction lists 1995 releases in the genres and 1996 releases through the summer cites the more memorable films in the genres for both the current period and 1900 1984 and serves as an index to key titles in the main list including long lost titles such as the obscure silent *Were Tiger* and the 1931 *The Phantom* Willis includes many films from around the world that are not found in any other English language film reference work One appendix provides thumbnail descriptions of problem and peripheral films another updates entries in the first three books with alternate titles and a third appendix serves as an index to the approximately 7 000 films listed in the first three volumes in the series as well as in the current volume thus bringing the total number of films covered in this series to roughly 11 000 titles *Movies in America* William Kuhns,1975 This work
