Fostering Innovation Bill Artzberger, 2022-12-28 While

innovation can be defined in many ways the author sees it as a process It is not the sudden eureka moment in the middle of the night nor is it a clear and linear path towards a final destination Instead it involves a strong sense of creativity and curiosity An innovative mind has a natural inclination towards out of the box thinking It involves a willingness to try something new without fear or judgment to develop something no one else has ever articulated While the mindset comes naturally it requires fuel to keep it running Innovators are voracious readers and researchers They feed their mindset all of the fuel it needs to stay informed and relevant in their field Many of the same things can be said for the Lean mindset Lean management doesn t happen overnight and it is very rarely a clear and linear path to true Lean thinking Some might

consider Lean a subset of innovative thinking while others see it in reverse Regardless of the relationship s directionality one thing is certain You cannot have one without the other This book follows John Riley the CEO of a medium sized valve company just outside of Pittsburgh Pennsylvania who will stop at nothing to create an innovative work environment Through the ups and downs of his journey he learns a number of Lean and innovative skills strategies and mindsets to help him build the business he s always envisioned for himself Throughout the book you see examples of both strong and poor innovative leadership skills demonstrated by each of the main characters The key messages are ones that help leaders build and access a mindset insistent on continuous improvement Leadership techniques and abilities that bolster creative thought and problem solving are the most successful throughout this book To be truly innovative you can never stop driving the learning process For this to happen leaders need to recognize when there is a need for a change or improvement This is the beauty of the marriage between Lean and innovation They both require continuous learning and growth The desire to improve is only one piece of this equation however The other is the willingness to act Without both of these factors true innovation will always be out of reach
