Storm: A thriller-like dystopian cli-fi novel set in 2043 Daniel J Mooney, 2025-07-10 In 2043 the climate has finally changed. The planet is ravaged by violent storms and failing crops and much of the world is now uninhabitable. Amidst a world of hungry and desperate people, the Department of Environmental Justice has been tasked with finding and executing those who have denied climate change. On the eve of the 14th storm, Broderick and Malley are asked to hunt the leader of a stirring rebellion, but something feels wrong. Broderick is shut off and interested only in exacting revenge. Malley is sceptical and thinks their latest target is more politically motivated than their employer is letting on. Their journey is upended by Fionnuala, a young and idealistic runaway who is hopeful for the future and desperate to save the target. Together, the three of them must learn to adapt to the climate and the polarised groups if they are to survive. Rarely have I seen satire and dystopian literature combined to such compelling effect. Jack Fennell. Daniel J Mooney is an Irish author. Inspired by current events and global voices, his debut *Me, Myself and Them* was published in 2017, followed by *The Great Unexpected* in 2018.

Our Shared Storm Andrew Dana Hudson, 2022-04-05 Through speculative fiction, five interlocking novelettes explore the possible realities of our climate future. What is the future of our climate? Given that our summers now regularly feature Arctic heat waves and wildfire blood skies, polar vortex winters that reach all the way down to Texas, and 100-year storms that hit every few months, it may seem that catastrophe is a done deal. As grim as things are, however, we still have options. Combining fiction and nonfiction and employing speculative tools for scholarly purposes, *Our Shared Storm* explores not just one potential climate future but five possible outcomes dependent upon our actions today. Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson, *Our Shared Storm* features five overlapping fictions to employ a futurist technique called scenarios thinking. Rather than try to predict how history will unfold, picking one out of many unpredictable and contingent branching paths, it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways (SSPs). The setting is the year 2054 during the Conference of the Parties (COP) global climate negotiations, aka The COP in Buenos Aires, Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political, economic, and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed, kicked down the road, or abandoned altogether. From harrowing to hopeful, these stories highlight the choices we must make to stabilize the planet. *Our Shared Storm* is an experiment in deploying practice-based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks.
