**The Non-Technical Founder** Josh MacDonald, 2018-04-03 Everyone has an idea that they think is the next big thing. The problem is it's probably an app or software idea and most people probably don't know how to code and their record for managing programmers is little to none. Even if they do know how to code they're not quite sure how to get their first one thousand customers. The Non-Technical Founder walks readers through the stages of validating whether their next big thing is good, bringing the idea to life and getting those first customers. *Parenting in the Zombie Apocalypse* Steven J. Kirsh, 2019-06-04 Parenting is difficult under the best of circumstances but extremely daunting when humanity faces cataclysmic annihilation. When the dead rise, hardship, violence, and the ever-present threat of flesh-eating zombies will adversely affect parents and children alike. Depending on their age, children will have little chance of surviving a single encounter with the undead, let alone the unending peril of the Zombie Apocalypse. The key to their survival and thus the survival of the species will be the caregiving they receive. Drawing on psychological theory and real-world research on developmental status, grief, trauma, mental illness, and child-rearing in stressful environments, this book critically examines factors influencing parenting and the likely outcomes of different caregiving techniques in the hypothetical landscape of the living dead. Edinburgh Companion to Contemporary Narrative Theories Robyn Warhol, Zara Dinnen, 2018-04-13 A collection of original essays establishing how wide the intellectual boundaries of narrative theory have become. The Edinburgh Companion to Contemporary Narrative Theories showcases the latest approaches to diverse narratives across many media and in numerous disciplines. Attending to literary, digital, visual, cinematic, televisual, and aural forms of storytelling, this book brings founders of the field of post-classical narrative theory together with senior and emerging scholars. This is the first anthology to consider what narrative is and what it can do in the wake of various turns in literary studies which have been appearing in the context of digital media and algorithmic capital. From mind-centred and philosophical approaches to theories focusing on gender, race, and sexuality, the chapters touch on poetry, drama, digital games, podcasts, coding, speculative fiction, the law, medical narrative, oral storytelling, and comics, as well as the more traditional areas of fiction, TV, and film. This is the future of narrative theory. **Key Features:** Includes popular culture genres, comics, video games, coding, not covered in depth in other companions to narrative theory. Showcases essays on narrative dimensions of law, medical ethics, linguistics, and philosophy, as well as more obviously narrative genres. Attention given to race, gender, sexuality distributed throughout the volume, not isolated in a single section. New essays by superstars in narrative theory: Phelan McHale, Lanser Richardson, Abbott Currie, as well as other well-respected and emerging scholars.
