EVOLUTION AND ETHNOBOTANY

NATURAL SCIENCES | BIOLOGY | BOTANY

Cannabis: Evolution and Ethnobotany is a comprehensive interdisciplinary exploration of the natural origins and early evolution of this famous plant, highlighting its historic role in the development of human societies. The plant *Cannabis* has long been prized for the strong and durable fiber in its stalks, its edible and oil-rich seeds, and the psychoactive and medicinal compounds produced by its female flowers. The culturally valuable and often irreplaceable code derived from *Cannabis* deeply influenced the commercial, medical, ritual, and religious practices of human cultures throughout the ages, and production of these commodities directed the evolution of the plant toward its contemporary varieties. As interest in *Cannabis* grows and public debate over its many uses rises, this book will help us understand why humanity continues to rely on this plant and adapts it to suit our needs.

"*Cannabis: Evolution and Ethnobotany* is one of the best—if not the best—history of the extraordinary plant *Cannabis sativa* that I have read. A must for libraries, scholars of *Cannabis*, and the growing number of readers who are interested in this remarkable plant."

Lester Grinspoon, Emeritus Associate Professor of Psychiatry at Harvard Medical School and author of *Marijuana Reconsidered* and *Marijuana, the Forbidden Medicine*

"The authors boldly demonstrate their capacity to survey both the biological evolution and widely varied human cultural uses of *Cannabis*. In doing so, they have produced a work that is thorough, globally ambitious, and carefully constructed. The extraordinary power and range of their cross-cultural perspectives are likely to elicit fresh consideration of familiar studies."

Richard Tucker, School of Natural Resources and Environment, University of Michigan

"A unique and valuable work."

Ethan Russo, President of the International Cannabinoid Research Society

Commodifying Cannabis Bradley J. Borougerdi, 2018-11-19 Cannabis is a genetically diverse plant that has been commodified for a variety of different purposes by many cultures throughout world history For thousands of years people have used its fiber seed and flowers to make rope and cloth rig ships feed people and livestock concoct medicines and alter states of consciousness Until the nineteenth century though most Europeans and Americans were unaware of drug varieties of cannabis The British encountered them in India and created western style medicines that sold throughout the Atlantic world by the 1840s but negative associations with Oriental intoxication and degeneracy sullied the plant's reputation as a viable commodity Now after decades of transatlantic criminalization policies against cannabis in the twentieth century it is making a comeback In Commodifying Cannabis Bradley J Borougerdi traces the tangled histories of its use for fiber medicine and altered states of consciousness across the Atlantic world focusing on the dynamic interplay between these three different cultural applications to explain why the plant has transformed so many times throughout history The historical journey spans a vast geographical landscape and includes over three centuries of source material to illuminate the cultural foundations behind the myriad transformations cannabis has endured as a commodity in the Atlantic world **Medical Marijuana**

Weed Science Godfrey Pearlson, 2020-07-11 WHAT DO WE KNOW ABOUT MARIJUANA AND HOW DO WE KNOW IT Marijuana is the most frequently consumed illicit drug worldwide with over 158.8 million users according to the UN. Responding to public pressure, the US federal government is likely to legalize recreational marijuana within the next few years. With increasing numbers of people using cannabis both medically and recreationally, there are many looming questions that only science can answer. These include: What's likely to happen, both good and bad, if the US legalizes marijuana? What are some simple science-based rules to separate fact from fiction and to help guide policy in the highly contentious marijuana debate? Exactly what is cannabis doing in the brain that gets us high? A journey through THC neuroscience. Does cannabis really have medical benefits? What's the evidence? To what extent does cannabis impair driving? Can smoking marijuana in adolescence affect IQ or risk for developing schizophrenia? Is marijuana safe to use during pregnancy? Reviews the endocannabinoid system and why our bodies are full of weed receptors. Introduces readers to the various forms of marijuana: flower, dabs, hash, edibles, shatter, vapes, tinctures, oils, and synthetics. THC, CBD, and terpenes. Demonstrates how and why cannabis affects different people very differently. Discusses how MRI and PET scans can help show the effects of marijuana on the brain. Discusses long-term effects of adolescent and adult cannabis use. Examines the evidence for cannabis's role in increasing the risk for schizophrenia-like illnesses.

Yearbook of Transnational History Thomas Adam, 2022-05-05 The Yearbook of Transnational History is dedicated to disseminating pioneering research in the field of transnational history. This fifth volume advances the frontier of transnational history into early modern times. The six chapters of this volume explore topics and themes from early modern times to the fall of Communism. This volume includes chapters about the Huguenots and Sephardi Jews as transnational nations in the seventeenth and eighteenth century; the construction of cannabis knowledge; cultures in the transatlantic world of the nineteenth century; the role of the German pastor Martin Niemöller in the construction of transnational religious identities in the aftermath of World War II; and the labor migration from Cuba to East Germany within the Socialist world in the 1970s and 1980s.
