**Reader's Index and Guide** ,1913    [The Wiley International Handbook of History Teaching and Learning](#) Scott Alan Metzger, Lauren McArthur Harris, 2018-03-02 A comprehensive review of the research literature on history education with contributions from international experts The Wiley International Handbook of History Teaching and Learning draws on contributions from an international panel of experts Their writings explore the growth the field has experienced in the past three decades and offer observations on challenges and opportunities for the future The contributors represent a wide range of pioneering established and promising new scholars with diverse perspectives on history education Comprehensive in scope the contributions cover major themes and issues in history education including policy research and societal contexts conceptual constructs of history education ideologies identities and group experiences in history education practices and learning historical literacies texts media and social spaces and consensus and dissent This vital resource Contains original writings by more than 40 scholars from seven countries Identifies major themes and issues shaping history education today Highlights history education as a distinct field of scholarly inquiry and academic practice Presents an authoritative survey of where the field has been and offers a view of what the future may hold Written for scholars and students of education as well as history teachers with an interest in the current issues in their field The Wiley International Handbook of History Teaching and Learning is a comprehensive handbook that explores the increasingly global field of history education as it has evolved to the present day    [The Library Catalogs of the Hoover Institution on War, Revolution, and Peace, Stanford University](#)

videotaped classroom lessons despite the presence of instructional materials explicitly designed to support student discussion of debatable historical questions Analysis of teacher and student participation suggests a relationship between active teacher facilitation that reviews background knowledge and poses direct questions about texts and higher levels of student argumentation This dissertation is structured as three free standing papers each of which addresses one aspect of the larger study In the first paper I discuss the design of the quasi experimental study and report quantitative findings In the second paper I locate teacher facilitation of whole class historical discussion in the literature on classroom discourse and I propose a developmental framework for analyzing student historical argumentation in classroom discussion In the third and final paper I discuss the theoretical underpinnings of the intervention curriculum and offer two examples to illustrate the structure of the Document Based Lesson

*Defining Student Success*

Lisa M. Nunn,2014-04-15 The key to success our culture tells us is a combination of talent and hard work Why then do high schools that supposedly subscribe to this view send students to college at such dramatically different rates Why do students from one school succeed while students from another struggle To the usual answer an imbalance in resources this book adds a far more subtle and complicated explanation Defining Student Success shows how different schools foster dissimilar and sometimes conflicting ideas about what it takes to succeed ideas that do more to preserve the status quo than to promote upward mobility Lisa Nunn s study of three public high schools reveals how students beliefs about their own success are shaped by their particular school environment and reinforced by curriculum and teaching practices While American culture broadly defines success as a product of hard work or talent at school intelligence is the talent that matters most Nunn shows that each school refines and adapts this American cultural wisdom in its own distinct way reflecting the sensibilities and concerns of the people who inhabit each school While one school fosters the belief that effort is all it takes to succeed another fosters the belief that hard work will only get you so far because you have to be smart enough to master course concepts Ultimately Nunn argues that these school level adaptations of cultural ideas about success become invisible advantages and disadvantages for students college going futures Some schools definitions of success match seamlessly with elite college admissions definition of the ideal college applicant while others more closely align with the expectations of middle or low tier institutions of higher education With its insights into the transmission of ideas of success from society to school to student this provocative work should prompt a reevaluation of the culture of secondary education Only with a thorough understanding of this process will we ever find more consistent means of inculcating success by any measure
