**The Social Machine** Judith Donath, 2014-05-23 New ways to design spaces for online interaction and how they will change society Computers were first conceived as thinking machines but in the twenty first century they have become social machines online places where people meet friends play games and collaborate on projects In this book Judith Donath argues persuasively that for social media to become truly sociable media we must design interfaces that reflect how we understand and respond to the social world People and their actions are still harder to perceive online than face to face interfaces are clunky and we have less sense of other people's character and intentions where they congregate and what they do Donath presents new approaches to creating interfaces for social interaction She addresses such topics as visualizing social landscapes conversations and networks depicting identity with knowledge markers and interaction history delineating public and private space and bringing the online world's open sociability into the physical world Donath asks fundamental questions about how we want to live online and offers thought

provoking designs that explore radically new ways of interacting and communicating

### **Disinformation and Data**

**Lockdown on Social Platforms** Shawn Walker,Dan Mercea,Marco Bastos,2021-12-26 This book addresses the question of how researchers can conduct independent ethical research on mal mis and disinformation in a rapidly changing and hostile data environment The escalating issue of data access is thrown into sharp relief by the large scale use of bots trolls fake news and strategies of false amplification the effects of which are difficult to quantify due to a corporate environment favouring platform lockdowns and the restriction of access to Application Programming Interfaces APIs As social media platforms increase obstacles to independent scholarship by dramatically curbing access to APIs researchers are faced with the stark choice of either limiting their use of trace data or developing new methods of data collection Without a breakthrough social media research may go the way of search engine research in which only a small group of researchers who have direct relationships with search companies such as Google and Microsoft can access data and conduct research The chapters in this book were originally published as a special issue of the journal Information Communication Society

*Cyberspaces and Global Affairs* Jake Perry,Professor Sean S Costigan,2013-04-28 From the Facebook revolutions in the Arab world to the use of social networking in the aftermath of disasters in Japan and Haiti to the spread of mobile telephony throughout the developing world all of these developments are part of how information and communication technologies are altering global affairs With the rise of the social web and applications like Facebook YouTube and Twitter scholars and practitioners of international affairs are adapting to this new information space across a wide scale of issue areas In conflict resolution dialogues and communication are taking the form of open social networks while in the legal realm where cyberspace is largely lawless space states are stepping up policing efforts to combat online criminality and hackers are finding new ways around increasingly sophisticated censorship Militaries are moving to deeply incorporate information technologies into their doctrines and protesters are developing innovative uses of technology to keep one step ahead of the authorities The essays and topical cases in this book explore such issues as networks and networked thinking information ownership censorship neutrality cyberwars humanitarian needs terrorism privacy and rebellion giving a comprehensive overview of the core issues in the field complemented by real world examples
