are integrated into the cost management effort so you are expected to know a lot more than basic cost estimation and control techniques. Even though the exam is divided into 4 parts you will have to take 4 parts in the same day. Also topics covered in the different parts are in fact highly related. Therefore there is no reason why you should study on a part by part basis. We highly recommend that you study for the exam as a whole; this will give you a clearer picture on the big picture and on the various details. You may think of cost engineering as an adjunct of traditional engineering. The key objectives of cost engineering are 1 to arrive at accurate cost estimates and 2 to avoid cost overruns. Cost engineering encompasses a wide range of cost related aspects of engineering management. Keep in mind awareness of the related costs is a key factor in making the proper choice of engineering approaches to take. Although the cost engineering exam focuses primarily on the various cost analysis and estimation techniques, basic background knowledge of certain business management related disciplines will definitely help for those who have little experience on topics outside of the scope of traditional engineering. To be honest without possessing solid knowledge on these topics a candidate will have a very tough time mastering the skills of cost engineering. This is especially true when the TCMF Total Cost Management Framework methodology is in place to integrate Asset Operations and Project Management into a single model. Therefore we have included coverage on these basic knowledge in our study notes for you.
