 the Passive Solar Working Group s extensive European Passive Solar Handbook and to ensure that these simple models are  
 easy to use for design purposes It has defined the needs of the research program for a large model and has chosen the  
 Scottish program ESP as a large simulation model to be used as a reference for the analysis of the simplified ones Each  
 participant has commissioned the chosen model on his own computer and run a very simple exercise just to verify that the  
 program works similarly on the different machines The analysis of the large model is being brought on its different sections  
 such as input output heat transfer passive solar systems etc The group will run ESP using the same passive solar bulding
