Presto 3 Presto like Adagio is a solid mechanics code built on the SIERRA Framework The primary difference between the two codes is that Presto uses explicit time integration for transient dynamics analysis whereas Adagio is an implicit code Because of the similarities in input and usage between Adagio and Presto the user s guides for the two codes are structured in the same manner and share common material Once you have mastered the input structure for one code it will be easy to master the syntax structure for the other code To maintain the commonality between the two user s guides we have used a variety of techniques For example references to Presto may be found in the Adagio user s guide and vice versa and the chapter order across the two guides is the same On the other hand each of the two user s guides is expressly tailored to the features of the specific code and documents the particular functionality for that code For example though both Presto and Adagio have contact functionality the content of the chapter on contact in the two guides differs Important references for both Adagio and Presto are given in the references section at the end of this chapter Adagio was preceded by the codes JAC and JAS3D JAC is described in Reference 4 JAS3D is described in Reference 5 Presto was preceded by the code Pronto3D Pronto3D is described in References 6 and 7 Some of the fundamental nonlinear technology used by both Presto and Adagio are described in References 8 9 and 10 Currently both Presto and Adagio use the Exodus II database and the XDMF database Exodus II is more commonly used than XDMF Other options may be added in the future The Exodus II database format is described in Reference 11 and the XDMF database format is described in Reference 12 Important information about contact is provided in the reference document for ACME 13 ACME is a third party library for contact One of the key concepts for the command structure in the input file is a concept referred to as scope A detailed explanation of scope is provided in Section 1 2 Most of the command lines in Chapter 2 are related to a certain scope rather than to some particular functionality
