a cone had two

$$y = a(x-h)^2 + k$$

$$x = a(y-k)^2 + h$$

$$(x-h)^2 + (y-k)^2 = r^2$$

$$\frac{(x-h)^2}{a^2} - \frac{(y-k)^2}{b^2} = 1$$

$$\frac{(x-h)^2}{a^2} + \frac{(y-k)^2}{b^2} = 1$$

Conics Keith Kendig, 2020-07-29 This book engages the reader in a journey of discovery through a spirited discussion among three characters philosopher teacher and student Throughout the book philosopher pursues his dream of a unified theory of conics where exceptions are banished With a helpful teacher and example hungry student the trio soon finds that conics reveal much of their beauty when viewed over the complex numbers It is profusely illustrated with pictures worked out examples and a CD containing 36 applets Conics is written in an easy conversational style and many historical tidbits and other points of interest are scattered throughout the text Many students can self study the book without outside help This book is ideal for anyone having a little exposure to linear algebra and complex numbers Multiple View Geometry in Computer Vision Richard Hartley, Andrew Zisserman, 2004-03-25 A basic problem in computer vision is to understand the structure of a real world scene given several images of it Techniques for solving this problem are taken from projective geometry and photogrammetry Here the authors cover the geometric principles and their algebraic representation in terms of camera projection matrices the fundamental matrix and the trifocal tensor The theory and methods of computation of these entities are discussed with real examples as is their use in the reconstruction of scenes from multiple images The new edition features an extended introduction covering the key ideas in the book which itself has been updated with additional examples and appendices and significant new results which have appeared since the first edition Comprehensive background material is provided so readers familiar with linear algebra and basic numerical methods can understand the projective geometry and estimation algorithms presented and implement the algorithms directly from the book *Library of Congress Catalog: Motion Pictures and Filmstrips* Library of Congress, 1968 Readings in Computer Vision Martin A.
