

## **1.0 Introduction**

The Construction Environment, Health & Safety (CEHS) Manual (hereafter referred to as "this Manual") has been developed to identify the minimum requirements for Construction Subcontractors and their lower-tier subcontractors (hereafter referred to as "Subcontractor") which require personnel to perform construction activities at the Department of Energy's National Renewable Energy Laboratory (NREL) Sites.

## **1.1 Background**

It is DOE policy that all construction Subcontractors shall provide a safe and healthful workplace for their personnel. In part, these conditions will be ensured by implementing the worker safety and health program established in 10 CFR Part 851 —Worker Safety and Health Program. Each Contractor is responsible for ensuring compliance with "all applicable requirements" that govern their work at NREL facilities, including any consensus standards incorporated therein by reference.

## **1.2 Definitions :**

**Activity Hazard Analysis** A work control document that identifies the work tasks, hazards and controls of the work to be performed; and is conveyed to the workers for review, input, acceptance and adherence.

**Competent Person:** One who is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt, corrective measures to eliminate them. A Competent Person is also one who has extensive training knowledge/experience in a particular activity or job function. A Competent Person at NREL shall be capable of demonstrating the "knowledge and skill-sets" that match their "Competent Person" designation.

**Construction Activity:** Is any combination of erection, installation, assembly, demolition, or fabrication activities involved to create a new facility or to alter, add to, rehabilitate, dismantle, or remove an existing facility. It also includes the alteration and repair (including dredging, excavating, and painting) of buildings, structures, or other real property, as well as any construction, demolition, and excavation activities conducted as part of environmental restoration or remediation efforts.
