Readings in Family Theory Thomas R. Chibicos,Randall W. Leite,David L. Weis,2005 Readings in Family Theory is an anthology of classic and contemporary articles that provides a context for student learning by demonstrating how theory fits into the overall

process of scientific research on families. The book provokes student interest in theory by providing examples of the scholarly application of family theory to compare how people use similar processes in everyday life. Using this contextual orientation the selected readings examine nine prevalent theoretical perspectives from both family and human development sciences.

Developmental Psychopathology, Risk, Resilience, and Intervention Dante Cicchetti, 2016-02-01 Examine the latest research merging nature and nurture in pathological development. Developmental Psychopathology is a four volume compendium of the most complete and current research on every aspect of the field. Volume Four Genes and Environment focuses on the interplay between nature and nurture throughout the life stages and the ways in which a child's environment can influence his or her physical and mental health as an adult. The discussion explores relationships with family, friends and the community environmental factors like poverty, violence and social support, the development of coping mechanisms and more including the impact of these factors on physical brain development. This new third edition has been fully updated to incorporate the latest advances and to better reflect the increasingly multilevel and interdisciplinary nature of the field and the growing importance of translational research. The relevance of classification in a developmental context is also addressed including DSM 5 criteria and definitions. Advances in developmental psychopathology are occurring increasingly quickly as expanding theoretical and empirical work brings about dramatic gains in the multiple domains of child and adult development. This book brings you up to date on the latest developments surrounding genetics and environmental influence including their intersection in experience dependent brain development. Understand the impact of childhood adversity on adulthood health. Gauge the effects of violence, poverty, interparental conflict and more. Learn how peer, family and community relationships drive development. Examine developments in prevention science and future research priorities. Developmental psychopathology is necessarily interdisciplinary as development arises from a dynamic interplay between psychological, genetic, social, cognitive, emotional and cultural factors. Developmental Psychopathology Volume Four Genes and Environment brings this diverse research together to give you a cohesive picture of the state of knowledge in the field.

Lost and

Found Paul Florsheim, David Moore, 2020-01-02 Over the past six decades there have been dramatic changes in the dynamics of family life in the United States. Today about half of all babies born to mothers under the age of 25 will not live with their fathers for much of their childhood. From the perspective of many social scientists and politicians this change has wreaked havoc on society by trapping women and children in poverty and loosening the civilizing bond between men and their families. But what is causing the phenomenon? Some place blame at the feet of the young men themselves together with eroding cultural and family values. Others point to systemic failures in our economy or social support programs. Rather than assign blame the first goal of *Lost and Found* is to tell the stories of young men as they struggle with varying degrees of success to become fathers. The second goal is to outline a strategy for helping young fathers remain constructively involved with their partners and children. Drawing from their research with over 1 000 young parents in Chicago and Salt Lake City Paul

Florsheim and David Moore focus on a group of about 20 young fathers whose stories conveyed in their own words help the reader make sense of what is happening to fatherhood in America Having interviewed young fathers and their partners before and after their children were born these accounts provide a dynamic perspective on the development of young men and their relationships Young mothers the partners of these young men both corroborate and sometimes offer alternative or contradictory perspectives Oriented to undo stereotypes the authors introduce the notion of good enough fathering tempering the tendency to think simply in terms of good or bad fathers They go on to provide concrete recommendations for strengthening fathers roles and helping young fathers and mothers create stable home environments for their children whether the parents are together or not
