

Datacard 280P Card Personalization System

Issue high-quality, low-cost cards in a single-pass operation

The Datacard® 280P card personalization system lets you cost-effectively issue high-quality plastic cards in a fast, single-pass operation. Choose from embossed characters, magnetic stripes, smart cards, logos, text and bar codes to meet your needs.

This productive system offers an ideal solution for issuing credit, debit and ATM cards—or any other application where superior image quality and card durability are a must. Plus, its compact, space-saving design and optional pop-up keyboard make it a perfect fit for small work areas.

Modular design lets you buy only what you need

The basic Datacard 280P system offers quick, quiet and reliable embossing capabilities. Optional modules for magnetic stripe encoding, smart card personalization, color topping and printing of photos, logos,

text and other graphics allow you to configure a system that meets your current needs, then add more capabilities as you need them. This modular flexibility keeps your initial investment low and makes upgrading your system fast, easy and affordable.

Magnetic stripe and smart card options

Most of the world's point-of-sale systems require credit and debit cards with encoded magnetic stripes. But new financial card innovations—such as stored value cards—will demand smart card personalization capabilities. The 280P system's modular design makes this transition from magnetic stripes to smart cards easy and affordable for your organization.

The magnetic stripe module offers front and rear encoding capabilities. This flexibility—along with an optional indent printing feature—makes the Datacard 280P system a cost-effective solution for issuing Visa® Electron debit cards.

Built-in security helps prevent theft, fraud

We equipped the Datacard 280P system with a variety of security features to protect your cards, your data and your business. The card hopper, main cabinet and topper cabinet offer optional locking capabilities that protect card stock from theft or damage. The system traps used foil ribbons and rejected cards, which helps protect account numbers and other critical data.

The Datacard 280P system can also be linked to a host computer system for direct downloading of cardholder data, so you know exactly how many cards are issued, who authorized and printed them and who received them.

The Datacard® 280P system is a secure, modular solution for issuing high-quality credit, debit and ATM cards.
