

Refrigerator/Freezer Storage

- Most samples are labeled with storage temp
- Virtually all protein, DNA, and cell samples must be stored at 4°C (refrig) or at -20°C (lab freezer)
 - > Store lyophilized (powdered) protein or DNA samples at -20°C, unless otherwise labeled
 - > Store protein samples alphabetically
 - > Record the date on reagents upon arrival, then record when the sample is first opened
 - > Certain cell lines must be stored at -70°C or below or lose competence or viability
- Do not use defrosting (cycling) refrigerator/freezers
- Repeated freezing/thawing compromises most samples (aliquot samples on receipt into more usable volumes)
- If possible, have designated refrigerators and freezers for different courses

Biotechnology 101 Brian R. Shmaefsky,2006-10-30 What should the average person know about science Because science is so central to life in the 21st century science educators and other leaders of the scientific community believe that it is essential that everyone understand the basic concepts of the most vital and far reaching disciplines Biotechnology 101 does exactly that This accessible volume provides readers whether students new to the field or just interested members of the lay public with the essential ideas of biotechnology using a minimum of jargon and mathematics Concepts are introduced in a progressive order so that more complicated ideas build on simpler ones and each is discussed in small bite sized segments so that they can be more easily understood This short volume will enable students and lay people to understand the basics of one of the most

important scientific fields of endeavor for the future **America's Lab Report** National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2006-01-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined. What do they contribute to science learning? What can they contribute to science learning? What is the current status of labs in our nation's high schools as a context for learning science? This book looks at a range of questions about how laboratory experiences fit into U S high schools. What is effective laboratory teaching? What does research tell us about learning in high school science labs? How should student learning in laboratory experiences be assessed? Do all student have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience, looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished.

Wyman, 2012-12-06 BRIAN H DAVISON Oak Ridge National Laboratory MARK FINKELESTEIN National Renewable Energy Laboratory CHARLES E WYMAN Oak Ridge National Laboratory The Eighteenth Symposium on Biotechnology for Fuels and Chemicals continues to provide a forum for the presentation of research results and the exchange of ideas on advances in biotechnology for the production of fuels and chemicals. Although the emphasis is on utilization of renewable resources the scope of the Symposium is broader than this and includes bioconversion of fossil fuels and syngas and the new area of conversions in nonaqueous environments these areas were discussed in Session 5 and in a Special Topic Discussion Group at the Symposium. In addition recent developments in bioremediation were well represented in Session 6 and in the poster session. The Symposium involved both the development of new biological agents such as enzymes or microbes to carry out targeted conversions as well as bioprocess development. The first area covered improvements in enzymes as well as fundamental insights into substrate enzyme interactions and photosynthesis. The latter area focused on converting one

material into another using biological agents through combinations of chemical engineering biological sciences and fermentation technology This area also refers to an overall processing involving at least one biologically catalyzed step in combination with other physical and or chemical processing operations Agricultural crops such as corn and corn fiber as well as woody biomass and lignocellulosic wastes are emphasized for process feedstocks and their pretreatment investigated

Phage Display In Biotechnology and Drug Discovery Sachdev S. Sidhu, Clarence Ronald Geyer, 2015-03-16 *Phage Display in Biotechnology and Drug Discovery* Second Edition provides a comprehensive view of the impact and promise of phage display in drug discovery and biotechnology Building on the success of its previous edition the book discusses current theories principles and methods in the field and demonstrates applications for peptide phage display protein phage display and the development of novel antibodies The book provides readers with an overview of the amazing breadth of the impact that phage display technology has had on the study of proteins in general as well as the development of proteins It will be a valuable resource for those interested in using phage display and recombinant antibodies in basic research and drug discovery Key Features Describes the basic principles of phage display and the methods and systems that have been developed for key applications Outlines applications for peptide phage display in the development of vaccines and high throughput screens as well as the exploration of protein protein interactions and enzyme substrate characteristics Details the use of phage display in the engineering of protein stability the identification and mapping of protein protein interactions and the development of catalysts Provides broad coverage of the impact of phage display technology on the development of protein therapeutics Presents expert opinions on future challenges in the field
