Environmental Engineering G. Lindner, K. Nyberg, 2012-12-06 Chemistry and its products today play an important role in almost all industrial activities. Chemistry has captured our homes. We are supplied with new articles in an ever increasing stream. New uses are being discovered. Old products disappear. Continuing and fast expansion is expected for the chemical industry in its proper sense. The reason for this is of course that chemistry has created products which meet requirements that we consider urgent or which in different ways make work easier and make us more efficient, thereby increasing our standard of living in a wide sense in terms of money, more spare time, social security, better education, and better public health services. But a high standard of living also implies a good living environment. A lot of what has been done in praiseworthy aspiration of a better means of support and an improved standard of living has involved a wasting of non-renewable natural resources. The products themselves or their waste products may pose a threat to the objectives we are trying to attain.

[Green Sustainable Process for Chemical and Environmental Engineering and Science](#) Rajender Boddula, Abdullah M. Asiri, 2020-11-20 *Green Solvents for Environmental Remediation* provides an in depth overview of environmental remediation by using eutectic solvents, ionic liquids, biosolvents, and switchable solvents of ionic liquids, biosolvents, Gas expanded solvents, Liquid polymers, supercritical fluids, Polymer based green solvents, Switchable solvents, etc.
