Introduction

CHEMETRON MEDICAL GAS OUTLET STATIONS are designed to provide immediate supply of medical gases and vacuum at such points of use as hospital operating rooms, emergency rooms, intensive care and patient rooms, as well as non-hospital based facilities where a convenient source of medical gases and additional services are needed.

The medical gases include, but are not limited to, oxygen, nitrous oxide, compressed air, nitrogen, carbon dioxide, helium and mixtures of such gases used for medical purposes.

Medical Gas pipeline equipment must be kept in dependable operating condition at all times, and demand an effective conscientiously followed program of periodic inspection, cleaning, maintenance and repair.

For such a program, this manual is a concise, thorough, step-by-step guide for easy use by responsible maintenance personnel in hospitals or other installations where Chemetron medical gas outlet stations are installed.

Read this manual thoroughly, and follow it closely at each stage of cleaning, maintenance and repair procedures.

It is the responsibility of the user to maintain efficient performance of Chemetron medical gas outlet stations. Allied Healthcare Products, Inc. assumes no liability for accidents or other irregularities arising from failure to observe recommended maintenance procedures or follow cleaning, maintenance and repair practices as presented in this manual.

Instructions are applicable to the following series of quick connect stations: 500 and 560 DISS (Diameter Index Safety System) unit.
