

## Oil-Fired Furnaces

## INTRODUCTION

The SH Series Oil-Fired Furnaces are available in Upflow (SSHV), Lobby Upflow (SSHUL), Downflow (SSHV), and Horizontal (SSHH) models. The units are designed in capacities to heat the smallest prefabricated or the largest custom built houses, a single office or a large store or plant. See Fig. 1 and Table 1 for furnace descriptions and physical data. See Table 2 for burner data.

Furnaces may be matched with certain 2A series cooling coils to form combination heating/cooling systems (see Table 3) and employed with humidifiers and electrostatic air cleaners to form complete controlled environment systems.

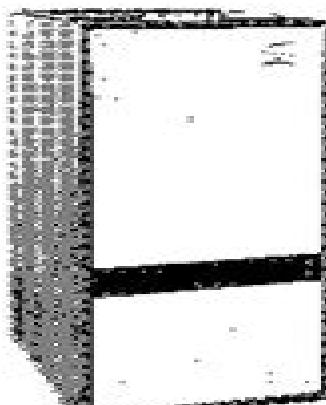

These units are tested and approved for use with No. 1 or 2 light fuel oil.

The furnaces are shipped as a packaged unit. The burners and controls are supplied as standard equipment, and may be shipped in a separate carton or completely wired and assembled in place. (See **Installing Procedures - Furnaces**.)

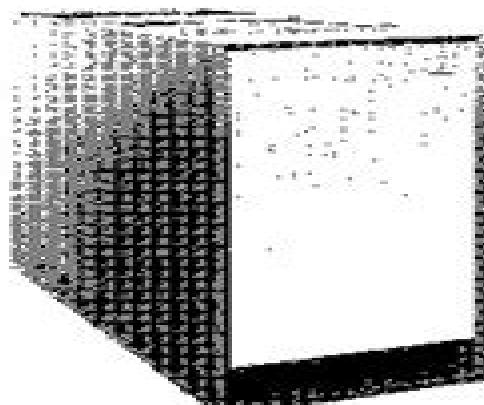

The control compartment, which is an integral part of these furnaces, is totally enclosed to provide a safe, compact, clean, and quiet control area.

When transporting unit, should any damage be observed, file claim with transportation agency.

This publication covers furnace installation, start-up, and service. For accessory installation details, refer to applicable installation literature.
