Cartas A Un Joven Científico Debate:

Cartas a un joven científico / Letters to a young scientist Edward O. Wilson, 2013-12-30 **Reflexiones para jóvenes arquitectos** Juhani Pallasmaa, 2025-06-02 Juhani Pallasmaa arquitecto y te rico de la arquitectura de gran reconocimiento internacional se dirige a estudiantes y jóvenes arquitectos para compartir con ellos sus pensamientos acerca del propósito de la arquitectura y su relación con otros ámbitos culturales Concebidos inicialmente como una serie de conferencias los textos que componen esta obra construyen una idea de la arquitectura basada en la autoconciencia la reconexión con el medio ambiente y la responsabilidad ética reflexiones profundas y sinceras que resultarán inspiradoras no solo para estudiantes y arquitectos también para diseñadores y otros profesionales de las industrias creativas *Una teoría con fallos. Hechos, mitos y paradojas del cambio del clima* José Carlos González Hidalgo, 2023-09-14 En la ciencia las verdades absolutas no existen y un sano escepticismo es fundamental pero el avance no consiste en comprobar nuestras teorías sino en exponerlas al debate aceptar solo los resultados favorables y desechar los discrepantes es una forma de corrupción La tesis dominante defendida en los informes del Panel Intergubernamental del Cambio del Clima IPCC por sus siglas en inglés establece que el aumento de las temperaturas tiene un origen humano y es malo Sus defensores arguyen que el debate termina y urgen a tomar medidas La justificación final es el consenso de los científicos y los resultados de los modelos pero el consenso no está demostrado y los modelos han sobrevalorado durante más de cuarenta años la evolución de las temperaturas En el presente texto el autor reflexiona sobre algunas de las posibles lagunas que hacen que la teoría dominante no cumpla las expectativas de explicar la evolución del clima actual por el efecto de las emisiones humanas y analiza hechos algunos mitos y varias paradojas Sabe el lector que el Antropoceno no es ningún período geológico Que no está demostrado el consenso científico sobre el origen del cambio del clima Que los eventos extremos no aumentan de modo generalizado Que no está demostrado el aumento generalizado de la frecuencia de los huracanes Que las muertes por fenómenos asociados a procesos atmosféricos disminuyen y que mueren más personas de frío que de calor Que los países insulares del Pacífico no se inundan de manera generalizada Ha pensado que a medida que aumenta la concentración de CO₂ su efecto sobre la temperatura disminuye Que el mundo es cada vez más verde y el desierto no avanza Que en la atmósfera primero aumenta la temperatura antes que el CO₂ Ortega nos enseña que las ideas se tienen y en las creencias se está por eso las primeras cambian y las segundas no Ambos conceptos explican las actitudes que hoy estamos viendo con el llamado cambio del clima un ejemplo de ciencia postnormal del que ya nadie recuerda el origen de los hechos por los que se decide pero del que todo el mundo opina en muchas ocasiones con información de segunda mano *Humanidades e investigación científica. Una propuesta necesaria* Norbert Bilbeny, Joan Guàrdia, 2015-02-10 En un mundo cada vez más especializado se hace necesario romper con el tópico de que la ciencia y las humanidades se oponen entre sí e incluso son radicalmente distintas en su naturaleza y función Plenamente arraigadas en la sociedad y en el avance del conocimiento no hay investigación sin interpretación ni interpretación

sin apoyo científico y sin un constante debate con el saber empírico. Desde la medicina la biología la filosofía la economía el derecho la física o la historiografía entre otras disciplinas se tratan en la presente obra cuestiones tan fundamentales como necesarias para nuestro progreso como sociedad. Mediante las aportaciones de prestigiosos especialistas y aunando sus distintas voces Humanidades e investigación científica se propone reforzar los vínculos entre ciencia y humanismo con la firme convicción de que solo así será posible afrontar los grandes retos globales de la sociedad actual. La cultura científica y la humanística entran en debate aquí y abren camino con paso firme hacia un futuro alentador.

Ingenuos, ignorantes, inocentes Carlos Calvo, 2019. En una serie de artículos el destacado educador y antropólogo hace una crítica al actual sistema escolarizado proponiendo una nueva forma de mirar el proceso de enseñanza aprendizaje. Dice el autor: Para enseñar hay que asombrar al educando quien a medida que intenta desvelar el misterio ir aprendiendo. Desde la perspectiva educacional el que lo haga bien o mal es secundario independiente del nivel de formación sea este el jardín infantil la escuela básica o media o la universitaria pues lo importante no son las respuestas correctas según los contenidos escolares sino la formulación de preguntas gracias a las cuales puede organizar la información sobre la base de criterios emergentes concebidos a partir de las regularidades observadas que le permiten elaborar un patrón explicativo. Concedo que a medida que se avanza en la escolaridad especialmente en la universidad se requieren respuestas y cada vez más precisas pero estas nunca deben sobrepasar ni en cantidad ni mucho menos en calidad a la generación de preguntas. Si aquello sucede se desvirtúa el proceso de aprendizaje que se vuelve meramente rutinario y falto de misterio.

Cartas a un joven científico Edward O. Wilson, 2014-01-16. Los sabios y apasionados consejos de E. O. Wilson a las nuevas generaciones de científicos. Querido amigo. Después de medio siglo de enseñar a estudiantes y a jóvenes profesionales de la ciencia he tenido el privilegio y la suerte de haber aconsejado a muchos cientos de jóvenes de talento y ambiciosos. Como resultado he acumulado un conocimiento profundo una filosofía en realidad de lo que es necesario saber para tener éxito en el ámbito de la ciencia. Espero que puedas sacar provecho de los pensamientos y relatos que te ofrezco a lo largo de las cartas que siguen. Ante todo y muy importante te exhorto a permanecer en el camino que has escogido y a seguirlo tan lejos como te sea posible. El mundo te necesita y mucho.
