Carte Blanche Marx Collectif:

The Handbook of Collective Violence Carol A. Ireland, Michael Lewis, Anthony Lopez, Jane L. Ireland, 2020-04-22 The first of its kind The Handbook of Collective Violence covers a range of contexts in which collective violence occurs bringing together international perspectives from psychology criminology and sociology into one complete volume There have been significant advances made in the last 25 years regarding how collective violence is conceptualised and understood with a move away from focusing on solely individual forms of violence toward examining and understanding violence that can occur within groups This handbook presents some of the most interesting topics within the area of collective violence drawing upon international expertise and including some of the most well known academics and practitioners of our generation Structured into four parts understanding war terrorism public order and organized violent crime and gang and multiple offender groups this volume provides academics and practitioners with an up to date resource that covers core areas of interest and application Accessibly written it is ideal for both academics and policymakers alike capturing developments in the field and offering a deep theoretical insight to enhance our understanding of how such collective violence evolves alongside practical suggestions for management prevention and intervention *Transcending Capitalism Through Cooperative Practices* Catherine Mulder, 2015-10-14 Transcending Capitalism Through Cooperative Practices identifies and analyzes sustainable alternatives to capitalism by examining five diverse enterprises including the London Symphony Orchestra the Green Bay Packers football team and the Lusty Lady sex club *Marxism and Law* Piers Beirne, Richard Quinney, 1982

Romanticism and Marxism Marcus Paul Bullock, 1987 Interest in Walter Benjamin's extraordinarily subtle imaginative use of the materialist view of history has grown strongly in recent years His interpretations of the changes in culture brought about by technological media of representation reproduction and dissemination and the intricate connections he explores between politics and the phenomena of literature and the arts continue to be among the richest sources of thought we have on these questions This book shows the relationship between his work and that of Friedrich Schlegel whose ideas were the foundation of the European Romantic movement and in many ways the basis of modern literary study The scope of this investigation extends to such diverse phenomena in our century as surrealism and the philosophical contradictions of modern physics *The Radical Left and Social Transformation* Robert Latham, Karen Bridget Murray, Julian von Bargen, A.T. Kingsmith, 2020-05-21 This comprehensive collection draws upon and reengages with a long history of Marxian anchored thought to analyze the potential for social transformation through a reinvigorated radical Left all within the context of the ascendance of an increasingly ethnonationalist patriarchal and authoritarian far Right worldwide The authors identify and reflect on strategies tactics and possibilities for analyzing and intervening in advanced capitalist societies by increasing and deepening popular participation and support on the far Left The chapters are framed in terms of conceptualizing the capitalist present organizing the people and reimagining the radical Left Together in diverse ways that draw upon both

qualitative and quantitative approaches the authors evaluate the difficulties of augmentation across multiple planes from the tension between migrants and citizen workers to the uneasy relationship between sovereignty and class to the contradictions operating across international versus domestic dynamics How and why if at all should the radical Left reexamine its understanding of political consciousness identity ideology and institutions as they relate to Marxian analysis and various threads of critical theory The authors suggest new approaches for understanding what the radical Left is up against and how problematic barriers might be torn down thus disrupting unhelpful binaries such as state versus capital national versus international worker versus migrant activist versus candidate and freedom versus necessity This book was originally published as a special issue of the online journal Global Discourse

The Battle of Adwa Paulos Milkias, Getachew Metaferia, 2005 Ethiopia trounced the Italians in 1896 in the greatest African victory over Europe since Hannibal but failed to prevent the loss of Eritrea The event was a powerful constitutive force in the rise of modern Africa and pan Africanism and resounds in the shared memory of Africans and Black Americans even today

South African Feminisms M.J. Daymond, 2013-05-13 This is the first collection of feminist critical essays by and about women in South Africa to appear outside of that country Many of the pieces were written after February 1990 when President de Klerk lifted the ban on black political organizations The recognition that a just society cannot be achieved without freedom from gender oppression as well as racial oppression informs these essays and has a direct bearing on the creation of a new society in South Africa
