to mapping and mapmaking from their arrival in the New World into the post suppression period placing it in the context of their worldwide undertakings in the fields of science and art Altic s analysis also shows the incorporation of indigenous knowledge into the Jesuit maps effectively making them an expression of cross cultural communication even as they were tools of colonial expansion This ambiguity she reveals reflects the complex relationship between missions knowledge and empire Far more than just a physical survey of unknown space Jesuit mapping of the New World was in fact the most important link to enable an exchange of ideas and cultural concepts between the Old World and the New **The Imperial**
