Caribbean Narratives of Belonging Jean Besson, Karen Fog Olwig, 2005 Contemporary Caribbean society emerged within a complex framework of extensive and exploitive interconnections on a global scale and unequal inter cultural social relations at the local level This book explores the communities of belonging that Caribbean people have created and sustained as they have carved out a life for themselves within this context of social economic and cultural complexity Caribbean narratives offer a fertile ground in which to explore notions and practices of belonging because they are rich in empirical data on the lives experienced by various Caribbean people At the same time they point to the shared socio cultural orders that give meaning and purpose to these lives By analyzing narratives as accounts of lived lives as a way of structuring the past and as modes of communication and performance the chapters in this volume develop important insights into Caribbean culture and bring fresh perspectives to cross cultural research on narratives and their articulation with fields of social relations and sites of cultural identity The sixteen chapters by anthropologists geographers historians and sociologists are based on in depth research from throughout the Caribbean region and among Caribbean migrants and their descendents in Europe and North America

The Unsettled Relationship Demetrios G. Papademetriou, Philip L. Martin, 1991-03-30 More than twenty million migrant workers send 40 billion to their countries of origin each year making labor second only to oil as the most important commodity traded internationally The essays contained here deal with this unsettled sociopolitical issue international labor migration and its relationship to economic development seeking to determine the effects of recruitment remittances and return migration on labor exporting countries Many analysts sending country governments employers and migrant workers feel that countries with unemployed workers should if possible export them to countries with labor shortages Remittances from migrants and returning workers who were trained abroad should stimulate economic growth enough to reduce unemployment and pressures to emigrate It was projected that within a decade or less labor importing countries would emerge from the labor shortage phase of their development However migrant workers have become a

structural feature of the economies in Western Europe the Middle East South Africa and the United States emigration does not promote development in the sending countries This collection of twelve chapters by experts in the field examines the conceptual and theoretical issues in international labor migration and looks at the relationship between migration and development in Africa between Mediterranean countries and Europe between Asian labor exporters and Middle Eastern importers and the effects of emigration on Latin America and the Caribbean In addition to comprehensive introductory and concluding sections Conceptual and Theoretical Issues in International Labor Migration and The Unsettled Relationship between Migration and Development the volume is divided into four additional sections that scrutinize labor migration and development in Africa Greece and Turkey Asian countries and Latin America Mexico and the Caribbean The book's recurring theme states that there is no iron law of migration induced development recruitment remittances and returns do not automatically generate stay at home development This first thorough and comparative treatment with its focus on the population social policy labor market language and foreign policy implications of recent and present policies will be invaluable for courses on refugees and migrants in sociology and comparative public policy Research libraries and international assistance organizations will find it an indispensable resource National Geographic Research ,1989
