Why do students continue to dissect animals in biology classes Why despite the excellence of teaching resources for
veterinary and human medical education that substitute for dissection do those provided for pre college students fall short in
convenience flexibility and coordination with the curriculum Why Dissection Animal Use in Education looks beyond the
typical yes or no debate about dissection to understand how we came to our current practice of dissection in intermediate
and high school biology even as preparation of health professionals has moved away from dissection Despite the many forces
that support the continued use of dissection in pedagogy teachers retain much autonomy in how they teach in the classroom
and legislation in many states provide specific requirements for what should and should not be taught in separated science
and health curricula offering students the option to not engage in dissection Why Dissection walks students teachers and
parents through these options to help them make more informed choices regarding their science education options
