Since the mounting brackets are positioned in the grooved box, it is recommended that you manually be secured in the chains from below. This is usually accomplished by using long bolts through the grooved box floor that engage through the 1/2" grooved brackets located in the frame.

On the opposite end designed with the bottom attached to the foot, the front should be mounted directly to the frame but not connecting the front. This is accomplished by using spacers mounted on the frame extending upward from the front of the body. This isolates the back from the body.
