Advanced Technology for Mid-Efficiency Gas Furnaces

Carrier leads the industry with our new Crusader gas furnace. This furnace is built with the most advanced manufacturing equipment, processes, and technology available in order to ensure top quality. Packed into the cabinet are the industry's foremost dealer and homeowner features. The 58SSC Upflow Furnace is the newest addition to Carrier's list of product leadership in the gas furnace business.

These induced-combustion, gas-fired furnaces offer not only low installation costs, but true economy as well — delivering an Annual Fuel Utilization Efficiency (AFUE) rating of 80 to 81½. The Carrier Crusader utilizes a pilotless, silicon carbide ignition system to save energy and increase reliability. This ignition system does not have a pilot flame to waste gas, nor a pilot orifice to become clogged.

Our engineers used the patented S shaped, four-pass duct exchanger to make the Carrier Crusader the first mid-efficiency furnace that is only 40 inches tall. The Super-S duct exchanger provides better heat transfer while enabling us to make a more compact furnace. This provides more room in closets, utility rooms, and other basement installations especially with today's rather high efficiency builds. The Carrier Crusader will fit where other furnaces will not — accomplishing a whole change, a minimalist-sized heat exchanger guaranteed by a 20-year Limited Warranty.
