Cartographies Of Danger Cartographies Of Danger:

Cartographies of Danger Mark Monmonier, 2008-04-15 No place is perfectly safe but some places are more dangerous than others Whether we live on a floodplain or in Tornado Alley near a nuclear facility or in a neighborhood poorly lit at night we all co exist uneasily with natural and man made hazards As Mark Monmonier shows in this entertaining and immensely informative book maps can tell us a lot about where we can anticipate certain hazards but they can also be dangerously misleading California for example takes earthquakes seriously with a comprehensive program of seismic mapping whereas Washington has been comparatively lax about earthquakes in Puget Sound But as the Northridge earthquake in January 1994 demonstrated all too clearly to Californians even reliable seismic hazard maps can deceive anyone who misinterprets known fault lines as the only places vulnerable to earthquakes Important as it is to predict and prepare for catastrophic natural hazards more subtle and persistent phenomena such as pollution and crime also pose serious dangers that we have to cope with on a daily basis Hazard zone maps highlight these more insidious hazards and raise awareness about them among planners local officials and the public With the help of many maps illustrating examples from all corners of the United States Monmonier demonstrates how hazard mapping reflects not just scientific understanding of hazards but also perceptions of risk and how risk can be reduced Whether you live on a faultline or a coastline near a toxic waste dump or an EMF generating power line you ignore this book's plain language advice on geographic hazards and how to avoid them at your own peril *Cartographies of Danger, Mappi ...* Monmonier, 1997 **Making Threats** Betsy Hartmann, Banu Subramaniam, Charles Zerner, 2005 Today we live in times of proliferating fears The daily updates on the ongoing war on terror amplify fear and anxiety as if they were necessary and important aspects of our reality Concerns about the environment increasingly take center stage as stories and images abound about deadly viruses alien species invasions scarcity of oil water food safety of GMOs biological weapons and fears of overpopulation *Making Threats Biofears and Environmental Anxieties* addresses how such environmental and biological fears are used to manufacture threats to individual national and global security Contributors from environmental studies political science international security biology sociology and anthropology discuss what they share in common the view that fears should be critically examined to avoid unnecessary alarm and scapegoating of people and nations as the enemy Other In these highly original and thought provoking essays *Making Threats* focuses on five themes security scarcity purity circulation and terror No other book has systematically examined the proliferation of fear in the context of current world events and from such a multidisciplinary perspective It consolidates in one place cutting edge research and reflection on how the contemporary landscape of fear shapes and is shaped by environmental and biological discourses By uncovering the linguistic tools that make fear resonate in the public consciousness by identifying the interests that create or are sustained by fears in short by giving fears histories *Making Threats Biofears and Environmental Anxieties* engages with some of the most potent and disturbing political and

cultural aspects of the contemporary scene **No Go World** Ruben Andersson, 2022-03 From the Afghan Pakistan borderlands to the Sahara images of danger depict a new world disorder on the global margins With vivid detail Ruben Andersson traverses this terrain to provide a startling new understanding of what is happening in remote danger zones Andersson takes aim at how Western states and international organizations conduct military aid and border interventions in a dangerously myopic fashion further disconnecting the world's rich and poor Risk obsessed powers are helping to remap the world into zones of insecurity and danger resulting in a vision of chaos crashing into fortified borders Andersson contends that we must reconnect and snap out of this dangerous spiral which affects us no matter where we are Only by developing a new cartography of hope can we move beyond the political geography of fear that haunts us From back cover **ACSM Bulletin** ,2000 GeoWorld ,2000 *Proceedings of LIMA International Maritime Conference 2005* Nazery Khalid, 2007 **GIS World** ,1998 *Seismological Research Letters* ,1998 **The New Republic** Herbert David Croly, 1998 *Mercator's World* ,1997 New Scientist and Science Journal ,1999 **The Global Politics of Contemporary Travel Writing** Debbie Lisle, 2006-11-02 This book brings the serious world of politics to the superficial world of contemporary travel writing Technology Review ,1997 **Technical Report** Marshall Lew, 2002 **Book Review Index** ,2003 Vols 8 10 of the 1965 1984 master cumulation constitute a title index **Planning for Post-disaster Recovery and Reconstruction** James Schwab, 1998 This comprehensive handbook for disaster response and recovery can help community leaders and planners educate their constituencies on how informed decisions and choices can affect the rebuilding process and yield a safer more sustainable community It includes a primer in disaster operations a planner's tool kit for both emergency and long term measures a section on hazard identification and risk assessment and several comprehensive case studies *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,1999 **The Handy Geography Answer Book** Matthew Todd Rosenberg, 1999 **Environment & Planning** ,2003
