Distinct from school administrators, teacher leaders are professionals who remain in the classroom and use their specialized knowledge and skills to improve student achievement, influence others, and build organizational capacity. Written by leading educational researchers, each chapter of *The Power of Teacher Leaders* describes a different way that teachers are leading. Moving beyond the question of why teacher leaders are important and how such work is implemented, the contributing scholars to this collection offer a critical examination of the field by presenting original research, case studies, and programs in practice. Topics covered include how teachers become leaders, their wide-ranging leadership roles, and the effects of teacher leadership on student academic success and school communities. A cohesive edited collection, this book demonstrates how teacher leaders play an increasingly active role in the improvement of student learning, teacher professional development, and school climate. **Curriculum Planning** Forrest W. Parkay, 1993 The seventh edition of *Curriculum Planning* is a collection of readings that presents the knowledge, skills, and alternative strategies needed by curriculum planners and teachers at all levels of education from early childhood through adulthood. The book offers a variety of learning experiences for students with wide-ranging interests, learning styles, and backgrounds. Made up of ten chapters, the first six emphasize the development of knowledge and skills in the four bases of the curriculum: social forces, human development, learning, and knowledge and cognition. The last four chapters emphasize the application of curriculum planning skills for educational programs for children, early middle and late adolescents, and adult and senior learners. At all levels, current issues, innovations, and trends are examined from both theoretical and practical viewpoints.
