Insights from Practices in Community-Based Research Shannon T. Bischoff, Carmen Jany, 2018-03-19 Free Access in January 2019 There has been an increasing interest in the emerging subfield within linguistics and anthropology often referred to as community based research Himmelmann 1998 Rice 2010 Crippen and Robinson 2013 among others This volume brings together perspectives from academics community members and those that find themselves in both academia and the community The volume begins with a working definition of the notions of community based research as a practice and illustrates how such notions shifted without abandoning the outlined tenets within the working definition as the chapters developed to include notions of community based research as a tool and ideology as well as an orientation Each of the 17 chapters represents a case study with the first five including discussions of broader issues and theoretical perspectives while exploring community based research as an emerging subfield within linguistics The case studies comprise work from the Americas Australia India Europe and Africa The goal of the volume is to build on the emerging literature and practices in the field to arrive at a better understanding of how community based research is theorized and practiced in a variety of environments communities and cultures Engaging Undergraduates in Publishable Research: Best Practices Traci A. Giuliano, Jeanine L. M. Skorinko, Marianne Fallon, 2019-11-20 Although many articles and books have been written about conducting research with undergraduates there is a dearth of research on the process of publishing with undergraduates Thus in this research topic we assembled a collection of 43 articles from 98 researchers worldwide who are passionate about and have had success in publishing high quality peer reviewed journal articles with undergraduates The diverse articles represent a wide range of practices to help researchers publish with undergraduates including structuring the curriculum to promote undergraduate research and publication optimizing research experiences for undergraduates training students in implementing advanced techniques accessing special populations or conducting research in off campus settings addressing institutional and career challenges for faculty and increasing inclusion and diversity Each article provides a unique and diverse perspective that nevertheless resonates across contexts and situations We hope that the ideas models techniques and practices in these articles will motivate and inspire readers to begin continue or rethink how they engage undergraduates in publishable research we also hope to stimulate empirical and quantitative research on the effectiveness of these ideas models techniques and practices **Critical Futures: Community-Engaged Research in a Time of Social Transformation** Stuart R. Poyntz, Community-Based Research and Higher Education Kerry Strand, 2003-05-30 Community Based Research and Higher Education is the long awaited guide to how to incorporate a powerful and promising new form of scholarship into academic settings The book presents a model of community based research CBR that engages community members with students and faculty in the course of their academic work Unlike traditional academic research CBR is collaborative and change oriented and finds its research questions in the needs of communities This dynamic research model

combines classroom learning with social action in ways that can ultimately empower community groups to address their own agendas and shape their own futures At the same time it emphasizes the development of knowledge and skills that truly prepare students for active civic engagement Community Based Research and Higher Education is written by five academics from different disciplines with extensive experience in community based research as teachers researchers administrators scholars and community activists They draw on their own and others experience to develop concrete guidelines for creating and sustaining partnerships through CBR projects as they also outline the principles that guide decisions about research design and methods The authors offer extensive practical suggestions for incorporating CBR into courses and curricula include voices and experiences of people from across the country who are doing CBR on their campuses and in their communities and describe a wide range of exemplary research projects with diverse community partners such as the Southwest Improvement Council in Denver Washington D C s Council of Latino Agencies and Youthbuild a job training program based in New Jersey The authors conclude by detailing a series of action steps that can help institutions realize a vision of higher education based on research oriented campus community partnerships

CHANGING SOCIETY CHALLENGES AND STRATEGIES Dr. B. Venkata Subba Reddy & A. Jyotsna, 2016-05-01 The most common view of the relationship between social work and society seems to be the perspective that social work is an intermediary profession acting between the individual and society In this intermediary capacity social work is somehow able to act in ways that are in the best interests of both the individual and society seeking to empower the individual and to improve society Critics of social work reject the view of social workers as neutral and objective and see them rather as agents of social control largely acting in ways that perpetuate existing inequalities Social workers are or can be agents and catalysts of social change as intermediaries objectively balancing the pressures of social control and social change

Occupational Therapy for People Experiencing Illness, Injury or Impairment E-Book (previously entitled Occupational Therapy and Physical Dysfunction) Michael Curtin, Mary Egan, Jo Adams, 2016-12-16 The sixth edition of this classic book remains a key text for occupational therapists supporting their practice in working with people with physical impairments stimulating reflection on the knowledge skills and attitudes which inform practice and encouraging the development of occupation focused practice Within this book the editors have addressed the call by leaders within the profession to ensure that an occupational perspective shapes the skills and strategies used within occupational therapy practice Rather than focusing on discrete diagnostic categories the book presents a range of strategies that with the use of professional reasoning can be transferred across practice settings The new editors have radically updated the book in response to the numerous internal and external influences on the profession illustrating how an occupational perspective underpins occupational therapy practice A global outlook is intrinsic to this edition of the book as demonstrated by the large number of contributors recruited from across the world Covers everything the student needs within the physical disorders part of their course Links theory of principles to
