

## ACCESSES

### REMOTE CONTROL

#### Unlocking the cab

Press this button once to unlock your vehicle's cab.

The direction indicators flash twice.

Press this button a second time to unlock the side door(s) and the rear doors.

This selective function of the accesses is active when the vehicle is delivered. At your request, the network can deactivate this

electivity of opening between the cab and the load space, contact a CITROËN dealer.

#### Unlocking the load space

Press this button to unlock all of the rear doors.

This separation of the locking of the cab and load space is an operating security feature. It enables you to prevent access to the part of the vehicle from which you are absent.

#### Central locking

Press this button to lock your vehicle, cab and rear doors.

The direction indicators flash once.

If one of the front doors is open or is not closed correctly, the central locking will not work.

#### Deadlocking

If your vehicle is fitted with deadlocking, **a second press** on the closed padlock on the remote control within five seconds after locking changes the locking to deadlocking.

This is confirmed by fixed lighting of the direction indicators for approximately two seconds.

Deadlocking renders the exterior and interior door opening handles inoperative: do not leave anyone inside the vehicle when it is deadlocked.

If deadlocking is activated from inside the vehicle, it will change to normal locking when the vehicle is started.

#### Folding/unfolding the key

Press this button to release the key from its housing.

To fold the key, press the chromed button then fold the key into the housing. If you do not press the button, the mechanism may be damaged.

#### Good practice

Take care not to allow the remote control to come into contact with grease, dust, rain or a damp environment.

A heavy object attached to the key (keyring, ...) weighing on the shaft of the key in the switch, may cause a malfunction.
