Tradeoff Decisions in System Design A. Terry Bahill, Azad M. Madni, 2016-12-14 This textbook is about three key aspects of system design decision making under uncertainty trade off studies and formal risk analyses Recognizing that the mathematical treatment of these topics is similar the authors generalize existing mathematical techniques to cover all three areas Common to these topics are importance weights combining functions scoring functions quantitative metrics prioritization and sensitivity analyses Furthermore human decision making activities and problems use these same tools Therefore these problems are also treated uniformly and modeled using prospect theory Aimed at both engineering and business practitioners and students interested in systems engineering risk analysis operational management and business process modeling Tradeoff Decisions in System Design explains how humans can overcome cognitive biases and avoid mental errors when conducting trade off studies and risk analyses in a wide range of domains With generous use of examples as a common thread across chapters this book This book provides an excellent road map for designing and producing competitive products

Applying UML Rob Pooley, Pauline Wilcox, 2003-10-13 Unified Modeling Language UML is a general purpose notation language for specifying and visualizing complex software especially large object oriented projects Object oriented programming is when a programmer defines not only the data type of a data structure but also the types of operations functions that can be applied to the data structure Applying UML addresses the practical issues faced by users in adopting UML As the title suggests it helps the reader in actually applying UML to real life situations rather than just in learning the language The book covers in depth detail of UML including notation on profiles and extensions The scope of the book assumes prior experience in software engineering and or business modeling an understanding of object oriented concepts and a basic knowledge of UML Case study driven approach covering a wide range of issues Contains advanced tutorial material to aid learning Focuses on practical issues in the application of UML

The Craft of Model-Based Testing Paul C. Jorgensen, 2017-05-08 In his latest work author Paul C Jorgensen takes his well honed craftsman s approach to mastering model based testing MBT To be expert at MBT a software tester has to understand it as a craft rather than an art This means a tester should have deep knowledge of the underlying subject and be well practiced in carrying out modeling and testing techniques Judgment is needed as well as an understanding of MBT the tools The first part of the book helps testers in developing that judgment It starts with an overview of MBT and follows with an in depth treatment of nine different testing models with a chapter dedicated to each model These chapters are tied together by a pair of examples a simple insurance premium calculation and an event driven system that describes a garage door controller The book shows how simpler models flowcharts decision tables and UML Activity charts express the important aspects of the insurance premium problem It also shows how transition based models finite state machines Petri nets and statecharts are necessary for the garage door controller but are overkill for the insurance premium problem Each chapter describes the extent to which a model can

support MBT The second part of the book gives testers a greater understanding of MBT tools It examines six commercial MBT products presents the salient features of each product and demonstrates using the product on the insurance premium and the garage door controller problems These chapters each conclude with advice on implementing MBT in an organization The last chapter describes six Open Source tools to round out a tester's knowledge of MBT In addition the book supports the International Software Testing Qualifications Board's ISTQB MBT syllabus for certification Hydroinformatics Praveen Kumar, Mike Folk, Momcilo Markus, Jay C.
