Stiggins,Nancy Faires Conklin,1992-07-01 This book marks the starting point of a profound shift in assessment priorities detailing the results of a decade long program of research on classroom assessment environments It demonstrates how important sound classroom assessments are to student well being

and provides insights into the complex demands of day to day classroom assessment on teachers who have been taught little about assessment in their training programs As a nation we spend billions of dollars on educational assessment including hundreds of millions for international and national assessments and additional hundreds of millions for statewide testing programs On top of these the standardized tests that form the basis of district wide testing programs represent a billion dollar industry If we total all of these expensive highly visible politically important assessments we still account for less than one percent of all the assessments conducted in America's schools The other 99 percent are conducted by teachers in their classrooms on a moment to moment day to day and week to week basis Paradoxically virtually all of our national state and local assessment resources are being devoted to research and development for large scale assessments This book provides specific action programs for improving the quality of the other 99 percent the assessments that really drive what students learn and how they feel about it

What We Know About Grading Thomas R. Guskey, Susan M. Brookhart, 2019-02-04 Grading is one of the most hotly debated topics in education and grading practices themselves are largely based on tradition instinct or personal history or philosophy But to be effective grading policies and practices must be based on trustworthy research evidence Enter this book a review of 100 plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date with clear takeaways for learning and teaching Edited by Thomas R Guskey and Susan M Brookhart this indispensable guide features thoughtful thorough dives into the research from a distinguished team of scholars geared to a broad range of stakeholders including teachers school leaders policymakers and researchers Each chapter addresses a different area of grading research and describes how the major findings in that area might be leveraged to improve grading policy and practice Ultimately Guskey and Brookhart identify four themes emerging from the research that can guide these efforts Start with clear learning goals Focus on the feedback function of grades Limit the number of grade categories and Provide

multiple grades that reflect product process and progress criteria By distilling the vast body of research evidence into meaningful actionable findings and strategies this book is the jump start all stakeholders need to build a better understanding of what works and where to go from here Charting a Course to Standards-Based Grading Tim R. Westerberg,2016-08-24 What s the best way to ensure that grading policies are fair accurate and consistent across classrooms How can schools transition to a grading system that better reflects what students are actually learning Tim R Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment Destination 1 critically examines such popular grading mechanisms as the zero extra credit the semester killer project averaging mixing academic performance with work ethic and refusing to accept late work and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students Destination 2 invites educators to put assessment and grading into the larger context of a districtwide guaranteed and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades Destination 4 competency based education involves a total rethinking of the nature and structure of school leading to individualized education for all students However far they choose to go administrators and teacher leaders can turn to Charting a Course to Standards Based Grading for the quick wins and long term support and guidance they need to make the trip well worth the effort Classroom Assessment in Action Mark D. Shermis,Francis J. DiVesta,2011-05-16 Classroom Assessment in Action clarifies the multi faceted roles of measurement and assessment and their applications in a classroom setting Comprehensive in scope Shermis and Di Vesta explain basic measurement concepts and show students how to interpret the results of standardized tests From these basic concepts the authors then provide clear and ordered discussions of how assessment and instruction is integrated into a functional process to enhance student learning Guidelines are set forth for constructing various common assessments Procedures are laid out to evaluate and improve assessments once they are constructed Ultimately the authors shed light on the myriad of factors that impact test score interpretation In today s classroom technology has become a constant companion and Classroom Assessment in Action exposes teacher candidates to emerging technologies they might encounter in building their repertoire of assessments whether it be automated essay scoring or electronic portfolios Classroom Assessment in Action guides its readers to a complete and thorough understanding of assessment and measurement so that they can confidently work with students and parents in explaining results whether they are from a high stakes statewide assessment or the grading philosophy to which they ascribe **A Teacher's Guide to Classroom Assessment** Susan M.
