

## ClearSCADA

En este curso aprenderá como configurar una variedad de características del sistema ClearSCADA incluyendo los mímicos, los puntos de la base de Datos y la conexión con dispositivos SCADA.

Cuando el demo de ClearSCADA se ejecuta por primera vez, la interface cliente "Viewx" se pone en marcha automáticamente. Viewx es una interface cliente completa para el sistema ClearSCADA y se puede usar para:

- Acceder a la información de los valores de la Base de Datos, tanto los históricos como los actuales.
- Configurar los elementos de la Base de Datos, incluyendo los puntos y los despliegues gráficos en los mímicos.
- Responder a las alarmas.
- Creación de reportes.
- Configurar los programas lógicos y los esquemas que definan el comportamiento de su sistema.

El Viewx está diseñado para reducir los tiempos y los esfuerzos necesarios para configurar y mantener un sistema SCADA.

Para lograr esto, utiliza un innovador sistema de agrupación que funciona de manera similar que los folders de Windows Microsoft.

ClearSCADA utiliza un sistema de agrupación, similar al de Microsoft Windows. Esto le proporciona un mayor control sobre la forma en que la Base de Datos está estructurada y nos permite ofrecer características que reducen significativamente el costo y el tiempo necesarios para configurar, mantener y actualizar el sistema SCADA.

El sistema de folders ofrece varios beneficios sobre la tradicional tabla de tags:
