

## Lab 9: Climate Patterns

- Refer to Figure 9.1. How does the climograph for a coastal location (location A) differ from that of other coastal locations (locations B through D)? There are two questions to help you with your response: does the location's temperature range (a) is it within about a 10°C temperature range throughout the year? (b) is the average daily temperature close to 15°C throughout the year? The climograph also is temperature during the winter of a typical high-latitude location of about the same growth. It also indicates an average monthly temperature and rainfall for the same time period as well as the entire year. This helps to understand area's overall climate conditions, average temperature, air humidity, precipitation, rainfall amount, temperature annual range, and daily mean.
- Compare the two climographs (location A and B) (Figure 9.1). The climograph of location A is a coastal area (high temperature) and location B is a coastal area (low temperature). The climograph of location A is a coastal area (high temperature) and location B is a coastal area (low temperature). The climograph of location A is a coastal area (high temperature) and location B is a coastal area (low temperature).
