## **Climate Change Adaptation In Practice From Strategy Development To Implementation:**

*Climate Change Adaptation in Practice* Philipp Schmidt-Thome, Johannes Klein, 2013-04-17 Climate change adaptation is increasingly recognized as complementary part to climate change mitigation. Climate change affects sea level, the extent of flood-prone areas and precipitation patterns among many others. To adapt to these changes, the tasks of municipalities and cities are to implement policies and strategies for changes in land use and coastal management as part of their future development. It is of vital importance to address the uncertainties of climate change scenarios when proposing adaptation measures that are socially viable and economically reasonable. The decision-making process promoted here is based on scientific excellence as well as an integrated communication process. This book provides a comprehensive overview of key elements required for effective analysis and assessment of climate change impacts, economic cost-benefit analysis, communication processes and creation and transfer of knowledge, governance issues and implementation of related policies. It describes the results achieved by the BaltCICA ([www.baltcica.org](http://www.baltcica.org)) project whose contributors come from the scientific and public administration communities. The regional cooperation has led to the implementation of climate change adaptation in several case studies. The BaltCICA project developed concepts, methodologies and tools for climate change adaptation that can be translated across other global regions. Scientists and students working on the development of climate change and adaptation strategies, public administrators in the related fields on local, regional and state level, including environment, water management, civil defense as well as professionals working with adaptation technologies including engineering, technological solutions, urban planning agencies and construction will value this innovative book.

[Climate Change in the Asia-Pacific Region](#) Walter Leal Filho, 2015-04-02 This book investigates the socio-economic impacts of Climate Change in the Asia-Pacific region. The authors put forward a strategy and action plans that can enhance the capacity of government agencies and non-governmental organizations to reduce the negative impacts of climate change. The needs and interests of critical and neglected groups are highlighted throughout the book alongside the need for improving knowledge management on climate change. The case studies presented offer regional analyses for countries such as Australia, Bangladesh, China, Fiji, India, Mongolia, Nepal and the Philippines and cover issues such as livelihood vulnerability and displacement, climate migration, macroeconomic impacts, urban environmental governance and disaster management.

*Trans-jurisdictional Water Law and Governance* Janice Gray, Cameron Holley, Rosemary

Rayfuse, 2016-06-23 Governance of global water resources presents one of the most confounding challenges in contemporary natural resource governance With considerable government citizen and financial donor attention devoted to a range of international transnational and domestic laws and policies aimed at protecting managing and sustainably using fresh and coastal marine water resources this book proposes that sustainable water outcomes require a trans jurisdictional approach to water governance Focusing on the concept of trans jurisdictional water governance the book diagnoses barriers and identifies pathways to coherent and coordinated institutional arrangements between and across different bodies of laws at local national regional and international levels It includes case studies from the European Union Australia New Zealand South Africa the United States and Southeast Asia Leading specialists offer insights into the pretence and the promise of trans jurisdictional water governance and provide readers including students practitioners policy makers and academics with a basis for better analysing articulating and synthesising standards of good trans jurisdictional water governance both in theory and in practice

*Urban Resilience* Jon Coaffee, Peter Lee, 2017-08-24 As the cities of the world increasingly come under threat from crisis and disaster planners are searching for ways to build resilience into the foundations of modern urban centres This important book provides a comprehensive account of the theory and practice of urban resilience in response to a range of disruptions including terrorism climate change and economic crises It examines how the concepts and principles of resilience exert increasing significant influence over the form and function of planning Discussing a politics of resilience in which fundamental questions of social and spatial justice are posed this book examines how urban planners are increasingly tasked with the responsibility of safeguarding the future of urbanised centres and those that live in them

Drawing on international examples and detailed case studies this book provides a nuanced account of the uses and misuses of resilience and points a way forward for planning activity from an approach that is too often narrowly technical in focus towards an integrated and adaptable model for coping with risk crisis and uncertainty It will make essential reading for students of urban planning and researchers alike
