Climate Change Liability

Climate Change Liability Richard Lord, Silke Goldberg, Lavanya Rajamani, Jutta Brunnée, 2011-12-01 As frustration mounts in some quarters at the perceived inadequacy or speed of international action on climate change and as the likelihood of significant impacts grows the focus is increasingly turning to liability for climate change damage. Actual or potential climate change liability implicates a growing range of actors including governments, industry, businesses, non-governmental organisations, individuals and legal practitioners. Climate Change Liability provides an objective, rigorous and accessible overview of the existing law and the direction it might take in seventeen developed and developing countries and the European Union. In some jurisdictions the applicable law is less developed and less the subject of current debate. In others, actions for various kinds of climate change liability have already been brought, including high-profile cases such as Massachusetts v. EPA in the United States. Each chapter explores the potential for and barriers to climate change liability in private and public law.

Climate Change Liability Michael Faure, Marjan Peeters, 2011-01-01 This book sheds new light on the growing issue of using liability as a tool for both preventing and compensating for the damage caused by climate change. Michael Faure and Marjan Peeters have brought together a selection of expert contributors who explore a variety of both national and European perspectives on the topic. Climate change liability is no longer only a theoretical idea since climate change litigation has become so hotly debated and this book examines to what extent it can be used for mitigation and adaptation issues. Chapters discuss the potential role of liability within various legal systems like the national systems of the USA and The Netherlands but also EU and ECHR law. Liability is outlined in a broad perspective since not only compensation for damage suffered by plaintiffs is discussed but also the need for prevention in order to obtain a reduction of greenhouse gases.

Climate Change Liability and Beyond Jiunn-rong Yeh, Sandrine Maljean-Dubois, Yann Kerbrat, 2017-01-18 Climate change and its adverse impacts on nature and human society are clearly felt. Who should bear the responsibility? Should anyone be held liable for grave losses and damages related to climate change? In what way and to what extent can these issues be addressed in legal mechanisms both globally and locally? Will an international liability regime an ultimate solution? Are courts ready for and capable of resolving these disputes that find intricacy of law, policy and science? To shed light on these issues this book is structured with four main themes on the discussions of climate change liability and related mechanisms. They are 1 state liability and responsibility, 2 climate change litigation, 3 climate change liability and alternatives, and 4 dispute resolution and remedies. Reflections on the concepts of liability, responsibility, accountability have provided for nuanced understandings of their functional dynamics in climate change governance. Our findings also suggest that International and domestic courts have become a vital player in attribution or distribution of climate change liability. In addition to formalistic rights discourse and rigid liability regime a few alternatives such as carbon market insurance, mediation or soft law are also finding their ways to ensuring sustainability of climate change governance.

Deliberation Miriam Haritz,2011-01-01 This vitally important book asks Can the precautionary principle make uncertainty judiciable in the context of liability for the consequences of climate change and if so to what extent Drawing on the full range of pertinent existing literature and case law the author examines the precautionary principle both in terms of its content and application and in the context of liability law She analyses the indirect means offered by existing legislation being used by environmental groups and affected individuals before the courts to challenge both companies and regulators as responsible agents of climate change damage Page 4 of cover Symposium, Climate Change Liability and the Allocation of Risk ,2007

Meyer,Oliver C. Ruppel, Gerhard Schnedl, Karl W. Steininger, 2022 The recent past has seen a rise in litigation seeking to hold specific private and public actors liable for their contribution to and impacts of climate change with a relatively low success rate. This highlights the need for further research into the reasonable and just distribution of responsibility for mitigation and adaptation. This book unites renowned researchers from various disciplines to explore the challenges and opportunities of assigning responsibility and liability for climate change to specific actors. Thereby the importance of interdisciplinary scientific dialogue on climate change is strengthened and a new generation of jurists is to be provided with novel arguments for protecting our climate system. **Symposium: Climate Change Liability and the Allocation of Risk**, 2007
