A. The 6 Rules for Understanding Climate

1-3 move n-s

1. The sun heats the earth unequally. The more perpendicular the rays the more they heat the earth because the heat gets spread out over a larger area when it's less perpendicular
 - a. Result: temperature varies with latitude
 - i. Low latitude- more energy, higher temp
 - ii. High latitude- less energy, lower temp
2. The earth heats the air. (atmosphere)
3. Warm air is lighter than cold air (convection).
 - a. Warm - low pressure
 - b. Cold- high pressure
 - c. This will be important for air circulation cells.
4. Coriolis force deflects air E or W.

Try to imagine the left half of the image in 3-D but the points are:

Between 30° N and 30° S are the Northeast and Southeast Trade Winds.

Between 30° and 60° N and S are the Westerlies.

(Between 60° and 90° N and S the winds blow towards the west.)

If you want to really understand, follow the image link.

5. Warm air absorbs more moisture than cold air.
 - a. Rising cooling air cannot hold as much moisture so there is a lot of rain at equator. STH is dry (what's sth)
 - b. There is more evaporation at the equator because hot air holds more moisture
6. Water holds energy longer than air
 - a. Water holds heat more than land?? Except that's not in the uh lecture but same thing bc land heats air?

Asian/American Curricular Epistemicide Nicholas D. Hartlep,Daniel P. Scott,2016-08-18 In this important book Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans As Hartlep and Scott write Asian Americans have once again been constructed as the good minority that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality Over and over again the media has been telling a single story about Asian Americans to the public for the past fifty years The consequence of this fabricated story is that it discourages others even Asian Americans themselves from believing in the validity of their struggles Linshi 2014 p 1 Coastal Sediments '99 Nicholas C. HIV and Breastfeeding Pamela Morrison, 2022-02-24 In the early 1980s it was discovered that HIV the virus that causes AIDS could be passed through a mother's milk to her baby. Almost overnight in the industrialised countries and later in the African countries most ravaged by HIV breastfeeding became an endangered practice. But in the rush to reduce transmission of HIV everything we already knew about breastfeeding's life saving effects was overlooked with devastating consequences for mothers and babies. In 'HIV and Breastfeeding: the untold story' former IBCLC Pamela Morrison an acknowledged authority on HIV and breastfeeding reveals how women in the world's most poverty stricken areas were persuaded to abandon breastfeeding as part of a short sighted and deadly policy that led to an humanitarian disaster. The dilemma that breastfeeding an act of nurturing which confers food, comfort and love could be at once life saving yet lethal has been called the ultimate paradox. This critical account reveals how vital breastfeeding is even in the most difficult of circumstances and examines the lessons that can be learned from the mistakes of the past which is particularly relevant as we deal with the consequences for mothers and babies of another global pandemic Covid 19. With detailed information for HIV positive mothers and their caregivers and success stories from mothers themselves this book is essential reading for anyone involved in protecting and supporting breastfeeding or with a need for evidence based information about breastfeeding and HIV.
