The 12-Week MBA Bjorn Billhardt, Nathan Kracklauer, 2024-02-06 Based on a business leadership program taught to professionals at global Fortune 500 companies, this indispensable guide offers practical tips for managers and aspiring business leaders. Getting an MBA takes time and money, making it inaccessible to many people who want to take charge in the business world. The 12-Week MBA offers an alternative way to learn business essentials with a unique premise: business leaders in any industry, any function, and at any level, need the same core knowledge, skills, and attitudes to effectively manage and lead. That core consists of working through and with other people to create value while using financial concepts and metrics to maximize the value created for all company stakeholders. The timeless essence of managing numbers and leading people can be learned in less time and at a lower cost than in a traditional two-year MBA, where much of the curriculum may become obsolete by the time students graduate. Authors Bjorn Billhardt and Nathan Kracklauer are senior executives at Abilitie, a global leadership development company that has served over 100 000 learners in fifty countries. Now the key lessons from Abilitie's 12-Week

Case studies and discussion questions at the end of each chapter encourage higher-level thinking that can be applied to real-world experiences. Conclusion and Future Directions discussion at the end of each chapter reinforces topics and expands on how the topic will continue to evolve. Open-ended discussion questions at the end of each chapter enhance students' understanding of the subject covered. The mHealth chapter discusses all relevant aspects of mobile health, including global growth, new opportunities in underserved areas, governmental regulations on issues such as data leaking and mining, implications of patient-generated data, legal aspects of provider monitoring of patient-generated data, and increased responsibility by patients. Important content including FDA and state-based regulations, project management, big data, and governance models prepares students for one of nursing's key specialty areas.
