

The background of the cover is a deep blue space with a bright yellow and orange nebula or starburst at the top. Two dragons are depicted in a dynamic pose. One dragon, with green scales and red wings, is shown in profile, facing left, with its mouth open as if breathing fire or a plasma beam. The other dragon, with red scales and green wings, is shown from a more three-quarter view, facing right, with its mouth also open. They appear to be flying or falling through space, with a yellow, rocky celestial body visible in the bottom left corner. The title 'DRAGONS OF SATURN' is at the top in orange, 'CAST OUT' is in the center in large black letters, and 'Book 1' is below it in black. The subtitle 'BECKLEY AND SQUAMA'S SASSY SPACE OPERA SAGAS' is in a pink bubble on the right. The author's name 'TOBBIE E. FIGGS' and 'INTERACTIVE POP UPS' are at the bottom left.

Bartter, 1988-10-24 Bartter surveys 250 American science fiction stories and American SF novels with occasional overlaps of stories made into episodic novels that have some relationship often direct sometimes marginal to atomic weapons and their effects Highly recommended for popular literature collections Choice Divided into three principal parts The Way to Ground Zero begins by exploring The Way to Hiroshima Through a detailed analysis of the works included Bartter reveals the sociopolitical assumptions that authors took for granted and develops a method by which these assumptions can be disclosed She shows that encoded in these fictions we can find the patterns that led us to create and use the atomic bomb In the second section Bartter looks at the deeper assumptions on which these sociopolitical assumptions rest focusing particularly on those which perpetuate considerations of nuclear war

both in science fiction and in actual policy making Finally Bartter explores alternative assumptions proposed by innovative science fiction writers Throughout an attempt is made to forge a deeper understanding of the ways in which science fiction both reflects and influences human and international relations Students of science fiction and of literature and politics will find Bartter s work enlightening provocative reading Bartter argues that a close examination of American fiction particularly science fiction can offer important new insights into the events surrounding the bombing of Hiroshima in 1945 The use of an atomic bomb to end the war followed a scenario long established in science fiction defeating our enemy with a super weapon developed by native technological genius By examining the interrelationship between this persistent plot device and the development and use of a real super weapon Bartter sheds new light on the transactional role of literature and real life Her analysis is based on a comprehensive theory of human nature substantiated by exhaustive research in science fiction archives and libraries and covers a large number of stories both well known and relatively obscure featuring super weapons or super war and published by American authors **Music News** ,1929 **Cinefantastique** ,2006 **Bloomsbury Good Reading Guide** Nick Rennison,2006 Deciding what to read next when you ve just finished an unputdownable novel can be a daunting task The Bloomsbury Good Reading Guide features hundreds of authors and thousands of titles with navigation features to lead you on a rich journey through some of the best and most interesting books that have been published This greatly expanded edition also includes the latest contemporary authors and landmark novels An accessible and easy to read guide that no serious book lovers should be without Waterstone's Guide to Books Waterstone & Co,1989 The Encyclopedia of Science Fiction Peter Nicholls,1979
