Handbook of Research on

Technical, Privacy, and Security Challenges in a Modern World

Tyagi, Amit Kumar, 2022-06-30

More individuals than ever are utilizing internet technologies to work from home, teach and learn, shop, interact with peers, review medical records and more. While it is certainly convenient to conduct such tasks via the internet, this increased internet presence has also led to a rise in the search and availability of personal information, which in turn is resulting in more cyber attacks, privacy breaches and information leaks. Cyber criminals are using such opportunities to attack governments, organizations and individuals, making it necessary to anticipate, assess and mitigate privacy and security threats during this infodemic.

The

Handbook of Research on Technical Privacy and Security Challenges in a Modern World discusses the design and development of different machine learning systems including next generation applications in order to mitigate cyber attacks and address security challenges in everyday technologies. It further explores select methods and algorithms of learning for implementing better security methods in fields such as business and healthcare. It recognizes the future of privacy and the importance of preserving data through recommended practice feedback loops and smart agents. Covering topics such as face mask detection, gesture recognition and botnet attacks and detection, this major reference work is a dynamic resource for medical professionals, healthcare administrators, government officials, business executives and managers, IT managers, students and faculty of higher education, librarians, researchers and academicians.
