## Cli Fi Novel Stories:

**Cli-Fi and Class** Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn.

*(Eco)Anxiety in Nuclear Holocaust Fiction and Climate Fiction* Dominika Oramus, 2023-07-07 Eco Anxiety in Nuclear Holocaust Fiction and Climate Fiction Doomsday Clock Narratives demonstrates that disaster fiction, nuclear holocaust and climate change alike

allows us to unearth and anatomise contemporary psychodynamics and enables us to identify pretraumatic stress as the common denominator of seemingly unrelated types of texts. These Doomsday Clock Narratives argue that earth's demise is soon and certain. They are set after some catastrophe and depict people waiting for an even worse catastrophe to come. References to geology are particularly important in descriptions of the landscape the emphasis falls on waste and industrial bric a brac which is seen through the eyes of a future posthuman archaeologist. Their protagonists have the uncanny feeling that the countdown has already started and they are coping with both traumatic memories and pretraumatic stress. Readings of novels by Walter M. Miller, Nevil Shute, John Christopher, J. G. Ballard, George Turner, Maggie Gee, Paolo Bacigalupi, Ruth Ozeki and Yoko Tawada demonstrate that the authors are both indebted to a century old tradition and inventively looking for new ways of expressing the pretraumatic stress syndrome common in contemporary society. This book is written for an academic audience postgraduates, researchers and academics specialising in British Literature, American Literature and Science Fiction Studies.

**Fiction and the Sixth Mass Extinction** Jonathan Elmwood, 2020-04-01 Fiction and the Sixth Mass Extinction is one of the first works to focus specifically on fiction's engagements with human driven extinction. Drawing together a diverse group of scholars and approaches this volume pairs established voices in the field with emerging scholars and traditionally recognized climate fiction cli fi with texts and media typically not associated with Anthropocene fictions. The result is a volume that both engages with and furthers existing work on Anthropocene fiction as well as laying groundwork for the budding subfield of extinction fiction. This volume takes up the collective insistence on the centrality of story to extinction studies. In various and disparate ways each chapter engages with the stories we tell about extinction about the extinction of animal and plant life and about the extinction of human life itself. Answering the call to action of extinction

studies these chapters explore what kinds of humanity caused this event and what kinds may live through it what cultural assumptions and values led to this event and which ones could lead out of it what relationships between human life and this planet allowed the sixth mass extinction and what alternative relationships could be possible

The Routledge Handbook of Grassroots Climate Activism introduces contemporary forms of grassroots climate activism from around the world through the lenses of a variety of academic disciplines methodologies and perspectives Focusing on bottom up case studies it showcases innovative and creative approaches as well as the knowledge of those working towards swift decarbonisation just transitions and climate justice Grassroots climate activism presents a rich body of material to be studied not only by anthropologists sociologists geographers and political scientists but also by scholars in the humanities and the creative arts This timely handbook explores climate activism across six continents and it provides perspectives from climate activists themselves The authors interrogate a range of key questions what forms of mobilisation organisation and practice constitute grassroots climate activism and how have these changed over the last decade What are the boundaries of the climate movement and how does it interact with or differ from other social movements How do activists engage with the moral dimensions of the climate crisis How do grassroots engagements with climate struggles give shape to plural site specific but nonetheless interconnected forms of climate activism What tools do climate activists use to create functioning and effective local national and transnational networks How has climate activism been impacted by the Covid 19 pandemic What is the relationship between critical scholarship and climate activism What methodologies are particularly effective for studying climate activism and why This handbook aims to inspire others to devote more attention to grassroots climate activism It brings together established and up and coming scholars scholar activists and practitioners who present novel cutting edge research and new findings exploring current developments in different parts of the world This book will be of particular interest to students and scholars of climate activism climate solutions climate and society human environmental crises grassroots activism and social movements It will also be of interest to practitioners involved in climate action and to all those who are ready to launch their own grassroots initiatives or support one of the many already underway

*The Anthropocene* Seth T. Reno, 2021-11-22 Perhaps no concept has become dominant in so many fields as rapidly as the Anthropocene Meaning The Age of Humans the Anthropocene is the proposed name for our current geological epoch beginning when human activities started to have a noticeable impact on Earth's geology and ecosystems Long embraced by the natural sciences the Anthropocene has now become commonplace in the humanities and social sciences where it has taken firm enough hold to engender a thoroughgoing assessment and critique Why and how has the geological concept of the Anthropocene become important to the humanities What new approaches and insights do the humanities offer What narratives and critiques of the Anthropocene do the humanities produce What does it mean to study literature of the Anthropocene These are the central questions that this collection explores Each chapter takes a decidedly different humanist

approach to the Anthropocene from environmental humanities to queer theory to race illuminating the important contributions of the humanities to the myriad discourses on the Anthropocene This volume is designed to provide concise overviews of particular approaches and texts as well as compelling and original interventions in the study of the Anthropocene Written in an accessible style free from disciplinary specific jargon many chapters focus on well known authors and texts making this collection especially useful to teachers developing a course on the Anthropocene and students undertaking introductory research This collection provides truly innovative arguments regarding how and why the Anthropocene concept is important to literature and the humanities

**Cli-fi** Dan Bloom,2017 With the world facing the greatest global crisis of all time climate change personal and political indifference has wrought a series of unfolding complications that are altering our planet and threatening our very existence Reacting to the warnings sounded by scientists and thinkers writers are responding imaginatively to the seriousness of changing ocean conditions the widening disappearance of species genetically modified organisms increasing food shortages mass migrations of refugees and the hubris behind our provoking Mother Earth herself These stories of Climate Fiction Cli fi feature perspectives by culturally diverse Canadian writers of short fiction science fiction fantasy and futurist works and transcend traditional doomsday stories by inspiring us to overcome the bleak forecasted results of our current indifference Authors George McWhirter Richard Van Camp Holly Schofield Linda Rogers Sean Virgo Rati Mehrotra Geoffrey W Cole Phil Dwyer Kate Story Leslie Goodreid Nina Munteanu Halli Villegas John Oughton Frank Westcott Wendy Bone Peter

Timmerman Lynn Hutchinson Lee with an afterword by internationally acclaimed writer and filmmaker Dan Bloom [Fire and Snow](#) Marc DiPaolo, 2018-07-11 Fellow Inklings J R R Tolkien and C S Lewis may have belonged to different branches of Christianity but they both made use of a faith based environmentalist ethic to counter the mid twentieth century's triple threats of fascism utilitarianism and industrial capitalism. In [Fire and Snow](#) Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian environmental ethics of the Middle earth and Narnia sagas have been adapted by a variety of recent writers and filmmakers of climate fiction a growing literary and cinematic genre that grapples with the real world concerns of climate change, endless wars and fascism as well as the role religion plays in easing or escalating these apocalyptic level crises. Among the many other well known climate fiction narratives examined in these pages are *Game of Thrones* *The Hunger Games* *The Handmaid's Tale* *Mad Max* and *Doctor Who*. Although the authors of these works stake out ideological territory that differs from Tolkien's and Lewis's, DiPaolo argues that they nevertheless mirror their predecessors' ecological concerns. The Christians, Jews, atheists and agnostics who penned these works agree that we all need to put aside our cultural differences and transcend our personal socioeconomic circumstances to work together to save the environment. Taken together these works of climate fiction model various ways in which a deep ecological solidarity might be achieved across a broad ideological and cultural spectrum. **The Best American Short Stories 2025** Celeste Ng, Nicole A. Lamy, 2025-10-21 Short stories can act like little tuning forks helping us to clarify our own values, writes guest editor Celeste Ng. In a time when our values are being tested daily, it's hard to think of anything more important. **The Best American Short Stories 2025** resonates precisely at this pitch: twenty pieces that upend expectations and test the foundation of our beliefs. From a bereaved medical actress obsessed with a student in her rotation to a mysterious sickness that ignites a lethal running mania in its victims and from the grounds of a wild animal estate to a celebrity look-alike mother for hire, these stories transport readers to the impossible edges of our world and vivify characters who reflect the spectrum of human experience. **THE BEST AMERICAN SHORT STORIES 2025** INCLUDES LAUREN ACAMPORA, SARAH BRAUNSTEIN, BRET ANTHONY JOHNSTON, ELIZABETH McCACKEN, CARRIE R.
