

STAGES OF LIFESPAN DEVELOPMENT: FROM BIRTH TO ADULTHOOD

Development In Adulthood

Marion G. Mason

Development In Adulthood:

Human Development in Adulthood Lewis R. Aiken, 1998-01-31 Human Development in Adulthood is a comprehensive multidisciplinary overview of adult development in a number of areas both personal and societal from mental and physical health to economic and social conditions Variables including race gender economic status and political and religious affiliation are considered in the discussion of such human issues as love and marital relations economic concerns including employment and living conditions violence in its various forms including crime and war aging and death The numerous illustrations chapter summaries and glossary will prove especially useful to students [Handbook of Adult Development](#) Jack Demick, Carrie Andreoletti, 2003-01-31 The Handbook of Adult Development is an overview of the major theories and research in the field Included are sections on introductory theory and method biocognitive development in adulthood and social development in adulthood in addition to an introduction and epilogue by the editors This content will be useful for years to come By soliciting contributions from current leading theoreticians and researchers in the field of adult development the volume will present state of the art theory and research on this burgeoning subfield of developmental psychology Professionals clinicians researchers and academics in the larger field of development psychology will find the book an invaluable resource as will graduate students in the same field [Development in Adulthood](#) Barbara Hansen Lemme, 1995 With its multidisciplinary approach and focus on psycho social issues this topical text features coverage of the concepts and issues in the field of adult development Theoretical foundations include the life span developmental perspective and Bronfenbrenner's Ecological Systems Theory This text acknowledges that humans exist within multiple environments thus the individual is presented in the context of society and the resulting personal and social history An array of issues are integrated into the text including the influence of socio cultural biological economic and political forces The significance of cohorts gender race ethnicity socio economic status and culture are also emphasized [Adult Development](#) Susan K. Whitbourne, Comilda S. Weinstock, 1986-09-05 This volume contains an expansion of the material dealt with in the first edition plus extensive updating that incorporates significant recent research It presents an integrative view of the field of adult development as well as an orientation to research and practice for interested professionals The material is organized around a topical approach that deals with processes within several major areas of human functioning The book is for advanced undergraduates as it requires some sophistication on the part of the reader An excellent addition to academic libraries it can serve as a valuable reference and source book Choice The book is a distinctive contribution to the array of texts on adult development Whitbourne's second edition is a very useful and unique addition to the existing textbooks in the field It could well serve as a text for advanced courses on adult development particularly with a psychosocial orientation *Contemporary Psychology* [**Personality Development in Adulthood**](#) Lawrence S. Wrightsman, 1988-06-01 After many years of neglect the nature of personality development in adulthood is now recognised as a topic worthy of scholarly

attention. Designed as a text for advanced undergraduate and graduate courses on adulthood Personality Development in Adulthood first elucidates three common approaches to adult personality development early formation theories such as psychoanalysis and Berne's life script theory stage theory of psychosocial development represented by Erikson dialectic analysis which poses on going irreconcilable tensions between basic needs. Each approach is described the methods used to evaluate them considered and the quality of evidence examined. The second half of the book applies concepts *Cognitive Development in Adulthood* Mark L. Howe, Charles J. Brainerd, 2012-12-06. For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate. Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle *Progress in Cognitive Development Research*. Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e.g. logical and mathematical development, development of learning. All Progress volumes will be edited collections. Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors are being published as separate volumes within the series. A fairly broad definition of cognitive development is being used in the selection of books for this series. **Flourishing in Emerging Adulthood** Laura M. Padilla-Walker, Larry J. Nelson, 2017. Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period at least for a significant majority is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood e.g. identity, love, work, worldviews, the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world and how flourishing can occur in the face of challenge. Most chapters are accompanied by first person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians and university personnel who work with young adults or who study

development during emerging adulthood *Adult Development and Aging* Klaus Warner Schaie, Sherry L. Willis, 1986

Adulthood and Aging Douglas C. Kimmel, 1990 This classic work offers a thorough treatment of early and middle adulthood. It is the only text to integrate research from psychology, sociology, anthropology, medicine, and biology into a comprehensive interdisciplinary examination of adulthood. In-depth interviews with adults at various ages put theory into context, showing both long-term change and continuity. This new edition includes a new chapter on cognition, the Medicare changes of 1989, and many new references.

Early and Middle Adulthood Lillian E. Troll, 1975 Development in Adulthood Barbara H. Lemme, 1995-01-01

Middle Adulthood Sherry L. Willis, Mike Martin, 2005-06-23 Willis Pennsylvania State U and Martin's U of Zurich text considers facets of life from age 40 to 65. Taking a multicultural perspective, it addresses topics including the emergence of middle age as a normative developmental period in the life course, change and stability in personality during middle age, and cognitive development and decline.

Higher Stages of Human Development Charles Nathaniel Alexander, Ellen J. Langer, 1990 Can significant advances in development occur after adolescence? What are the highest possible states or stages of human development, and how can they be realized? These and related critical issues are addressed in this volume by leading researchers and theorists in adult development.

How we conceive of the endpoint or highest state of development is crucial because it shapes our understanding of the direction, possibilities, and mechanisms of human growth. Even a decade ago, most psychologists believed that qualitative advances in development did not occur after adolescence. Based on recent research on adults, however, psychologists now question whether growth of fundamental human capacities necessarily culminates prior to adulthood. This new volume explores a variety of endpoints beyond the ordinarily proposed limits of human development. In addition to describing advanced forms of cognitive functioning, contributors also discuss other domains integral to adult growth, including affective, moral, self, and consciousness development.

Adulthood and Aging Marion G. Mason, 2011 For undergraduate courses in Adulthood and Aging, Gerontology, and Adult Development. This text provides an engaging perspective on the issues, challenges, and joys of adult development and aging. It provides a balanced and integrated treatment of young, middle, and later adulthood, concluding with a discussion of life satisfaction and quality of life issues. More than ever, there is a need to inform those who will be therapists, health care professionals, social workers, and all others who plan to work with adults in some capacity of the challenges and opportunities that often come our way in adulthood. In addition, this text covers areas which are often neglected, such as self development and individual differences, life long learning, community and political life, and values, and moral development. The addition of these and other topics, along with a positive growth focused perspective, sets this book apart from other textbooks in this area that have grown out of gerontology backgrounds with a focus on physical decline and illness. The pedagogical features of the book direct students to key information and the special features engage the reader in current ethical dilemmas and life planning issues.

Clinical Approaches to Adult Development Or Close

Relationships and Socioeconomic Development Michael L. Commons, Jack Demick, Carl Goldberg, 1996 This volume is one of the first to concentrate on positive growth and development in a clinical arena rather than loss and pathology. In contrast to the general theories and cross sectional studies of existing adult developmental research much of this volume looks at the whole life level of development of adults through case studies. The book unites three compatible approaches to the study of adult development. The first considers the development of whole life. The second approach examines behavior during certain periods in adults' lives by combining clinical and developmental stage perspectives. The third approach examines periods of life following the work of Erikson, Levinson, and Vaillant. The editors of this volume believe that these three approaches form in their synergy a comprehensive and multifaceted approach to uniquely difficult problems of late adolescence and early adulthood. It is the unification of these three approaches that makes this book unique in its field.

Human Development Carroll E. Kennedy, 1978 *Adult Development* Michael L. Commons, Cheryl Armon, Lawrence Kohlberg, Francis A. Richards, Tina A. Grotzer, Jan D. Sinnott, 1990-05-23 In recent years researchers have begun to focus attention on postformal thought, the development of thought in late adolescence and adulthood, questioning Piaget's early terminus of structural development in adolescence. This volume brings together the works of distinguished authors in the field of postformal operational cognitive, social, and perceptual development to examine the models and methodology used to investigate postformal thought. The contributors represent the variety of approaches that characterize this body of research while at the same time seeking to unify this diverse literature with a common language. An ideal text for advanced courses in adult development, this volume is also a primary reference for developmental and educational psychologists and students working in the fields of cognitive development, adolescent and adult development, and lifespan development. Divided into four parts, the volume begins by examining both Piagetian and nonstructural models of adult cognitive development, considering them in light of current research developments. Individual papers address models of equilibrium, knowledge, reflective judgment, ego development, and consciousness. In Part II, the contributors discuss the measurement and comparison of cognitive development in adults, exploring such topics as construct validity and theories of adult development, the structural and developmental relations between formal and postformal capacities, and the relationship between Piagetian and Kohlbergian stages. The third section assesses the research and theory of adult reasoning in the moral domain while the concluding chapter investigates critical evaluations of postformal research. Numerous tables and figures enhance the discussions.

Handbook of Midlife Development Margie E. Lachman, 2002-03-14 Provides an up to date portrayal of human development in the midlife years. Each chapter includes coverage of unifying themes such as gender difference, ethnic variation, cultural diversity, and socioeconomic differences. The book is divided into four sections covering the theoretical, biomedical, psychological, and social aspects of midlife development.

The Development of Logic in Adulthood Jan Sinnott, 1998-03-31 In this book Jan D. Sinnott synthesizes her 20 years of research on lifespan cognitive development to

describe the growth of complex or postformal thought in adults. She shows specifically how adults improve mentally over a lifetime and learn to think in more complex and wiser ways. Applications of postformal thought are demonstrated in such diverse areas as family relations, adult education, personal identity and spirituality. Chapters examine relations between postformal thought and pertinent variables such as age, health, memory and vocabulary. Other sections deal with issues in humanistic psychology such as guided imagery, mind-body medicine and creative intentionality. Transcendence and Mature Thought in Adulthood Melvin E. Miller, Susanne R. Cook-Greuter, 1994. This book is one of the very first to concentrate upon positive growth and development in the more advanced years of life. Incorporating both traditional Western paths of development and Eastern meditative approaches and both theoretical and empirical material, the contributors explore the many paths to postformal and postconventional development. They challenge the field of psychology to reconsider some of its most fundamental premises concerning how people change and develop over the course of their lives, including many of its conventional metaphysical and ontological assumptions, and they challenge the reader to actively continue his or her own growth process.
