Wilson Company, Corinne Bacon, 1917    *Current Literature*, 1930    **The Transformative Potential of LGBTQ+ Children's Picture Books** Jennifer Miller, 2022-05-23 2023 CHOICE Outstanding Academic Title In The Transformative Potential of LGBTQ Children's Picture Books Jennifer Miller identifies an archive of over 150 English language children's picture books that explicitly represent LGBTQ identities, expressions, and issues. This archive is then analyzed to explore the evolution of LGBTQ characters and content from the 1970s to the present. Miller describes dominant tropes that emerge in the field to analyze historical shifts in representational practices which she suggests parallel larger sociocultural shifts in the visibility of LGBTQ identities. Additionally, Miller considers material constraints and possibilities affecting the production, distribution, and consumption of LGBTQ children's picture books from the 1970s to the present. This foundational work defines the field of LGBTQ children's picture books thoroughly yet accessibly. In addition to laying the groundwork for further research, The Transformative Potential of LGBTQ Children's Picture Books presents a reading lens critical optimism used to analyze the transformative potential of LGBTQ children's picture books. Many texts remain attached to heteronormative family forms and raced and classed models of success. However, by considering what these books put into the world as well as problematic aspects of the world reproduced within them, Miller argues that LGBTQ children's picture books are an essential world-making project and seek to usher in a transformed world as well as a significant historical archive that reflects material and representational shifts in dominant and subcultural understandings of gender and sexuality.    *Catalogue of Printed Books* British Museum, 1892    *Contemporary Illustrators of Children's Books*, 1930    Children's Catalog of One Thousand Books H.W. McClurg & Co, 1913    **Representations of Art and Art Museums in Children's Picture Books** Perry Nodelman, 2024-10-17 What happens when the assumptions and practices of museum curators and art educators intersect with the assumptions and practices of publishing for children? This study explores how over three hundred children's picture books, most of them published in the last three decades in English, introduce children to art and art museums. It considers how the books emerge from and relate to a range of theories and assumptions about childhood and childhood development, children's literature and culture, illustration, visual art, museology, and art education. As well as examining how these theories and assumptions influence what picture books teach young readers about visiting museums and about how to look at and think about art, it examines which artists and artworks appear most often in picture books and offers a survey of different kinds of art-related picture books: ones that claim to be purely informational, ones that make looking at art a game or a puzzle, ones in which children visit art museums, and many more. Since the books all include reproductions of or allusions to museum artworks, the study also considers the problems illustrators face in depicting museum artworks in illustrations in a different style.    **The Publishers' Circular and Booksellers' Record**, 1926    **The Publisher**, 1911    Children's Catalog H.W.
