

As you're able to focus more and more on you, you'll never run out of possibilities for growth, talents and skills, and once you begin to understand exactly what they admire and rely on you, it

Here's the funny part about discovering your place in the world is to immediately downplay your value. What you do because it comes to you so easily. Truth: Your unique combination of skills and talents can never be duplicated by anyone else.

The secret is to embrace this idea and then use your skills at every opportunity until you're worn out—which will ultimately mean learning to do energy-draining activities you're not competing in. That's where the power lies. Discovering what you're able to work in your zone is your surest path.

In Dan Sullivan's case, he's done the work to strengthen his own natural talents. One of his clients says it all:

"If you work throughout your life on improving yourself, you get a lot of really strong weaknesses."

Just think what's possible with a focus on your strengths.

#### What Dan's day looks like.

As the leader of a company that believes in continuous growth, Dan understands that the greatest productivity and results is a genuine passion and, just like compound interest, grows over time and your business.

He's also aware of where his mental energy is. This helps him to know when to rest. In fact, the entire team at Strategic Coach knows where everyone else on the team is.

When Dan comes into the office in the morning, he's supporting his day in all the right ways. He has his schedule for the day and has all the information he needs to go.

His direct team makes sure he has everything he needs throughout. Even our caterer is an important part of the team, ensuring another important and busy day. The team takes responsibility for something so he can focus solely on his work.

**Media Firms** Robert G. Picard, 2014-04-04 Media Firms presents studies applying the company level approach to media and communication firms. It explores differences among missions, strategies, organizational choices, and other business decisions. Reviewing economic factors and pressures on media and communications companies, this book seeks to improve understanding of how these elements affect market and company structures, operations, and performance of firms. The chapters, written by leading scholars worldwide, were selected from papers on the theme of media firms presented at the 5th World Media Economics Conference hosted by the Turku School of Economics and Business Administration and The Journal of Media Economics. The collected studies provide an overview of economic and related managerial issues affecting the structures of markets in which firms compete, the operations of media and communications firms, and their financial performance. As a result, it expands the discussion of economic issues traditionally associated with the field due to the narrowed focus of initial books in media economics. It is hoped that this book will induce additional avenues of inquiry regarding such issues.
